

Request Automation
For Datacenters

The image shows the top portion of a presentation slide. On the left is the Gridpro logo, which consists of a blue icon resembling two interlocking loops followed by the word "gridpro" in a bold, black, sans-serif font. To the right of the logo is the section header "EvOps for Azure Stack" in a blue, sans-serif font. Below the logo, the word "Overview" is written in blue, followed by a list of five items, each preceded by a small blue icon of two interlocking loops: "Marketplace Integration", "Workflows", "Approvals", "Extensions", and "ITSM Capabilities". Below this list, the text "Microsoft Azure Stack Integrated" is displayed in black. On the right side of the slide, a large paragraph of text in black states: "When organizations transition to the cloud, keeping business standards, cost control, and release processes is essential for IT to be able to provide innovation without compromising reliability." Below this paragraph, another paragraph in black states: "Gridpro is a Microsoft Certified Partner and Enterprise Cloud Alliance Member. We help organizations take control of how workloads are provisioned and managed in Microsoft Clouds by enforcing business control and standardization."

Boost Microsoft Azure Stack with request automation capabilities

Challenges

Are you experiencing these challenges in your organization?

- "Fewer people managing a growing number of services"
- "Processes needing automation"
- "Users having to access multiple portals for daily tasks"
- "Needing seamless integration with your ITSM solution"

If the answer is yes, you should definitely take a closer look at EvOps for Azure Stack!

Benefits

- Request Automation** – Integrated request automation for Microsoft Azure Stack
- Standardization** – Provision and manage workloads with business standardization governance
- Cost Control** – Prevent expensive workloads from being provisioned due to lack of business guidance
- Predefined Processes** – Avoid unexpected service downtime with predefined change and release processes
- IT Service Management** – Integration with leading ITSM tools like System Center Service Manager, and ServiceNow
- 3rd-Party Integration** – Extension integration with third party solutions including Office 365, Twilio, and others

System Requirements

Integrated Systems

- Cisco
- Dell EMC
- Hewlett Packard Enterprise
- Lenovo

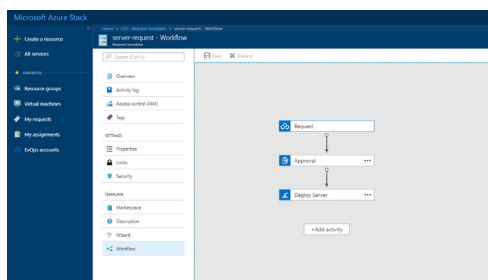

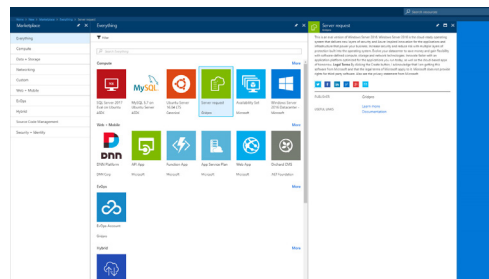

EvOps Integrations

- System Center Service Manager
- ServiceNow
- Custom Webhooks
- Office 365
- Service Management Automation (SMA)

Note: See our website for current available integrations, more will be added continuously.

Marketplace Integration

Design dynamic wizards that collect information from users to enable precise provisioning control.

Workflows & Approvals

Provision workloads and initiate automated activities based on business aligned decisions provided in the wizard.

Gridpro

Norrullsgatan 6
113 29 Stockholm, Sweden
Kronhusgatan 11
411 05 Gothenburg, Sweden

For resellers in Americas, Asia Pacific, Europe, Middle East and Africa, please visit www.gridprosoftware.com/about/resellers

Extensibility

Framework extending the platform with integrations that assist you with business compliance.
