

MANAGED ENDPOINT PROTECTION SMART CLOUDSERVICES

DATA SECURITY WITH MANAGED ENDPOINT PROTECTION FROM DRIVELOCK - AN INTELLIGENT ECONOMICAL INVESTMENT.

- ▶ **Uncomplicated and immediately available.**
The ready2go security solution ensuring the attainment of efficient and economical results.
- ▶ **Perfect data security delivered through a rugged security solution.**
The best possible protection provided for your data stored in a dedicated instance.
- ▶ **Individually tailored to meet your security requirements.**
Request your individual config changes based on fix price.
- ▶ **Low investment cost.**
Complete solution without infrastructure investment.
- ▶ **Based on Smart AppGuard.**

THE CHALLENGE.

The digital transformation, and the emergence of industry 4.0 within the field of manufacturing, is a major burden for many IT departments. A suitable security solution can be acquired and installed quickly.

The real challenge only starts afterwards: In order to ensure a lasting protection against virtual attacks and their resulting legal consequences (DSGVO), the security solution utilized must be continuously adapted to the current threat situation.

Updating cycles for security software are becoming ever shorter. The effort - both in terms of personnel and finances - is no longer feasible for many companies.

Companies need to focus on analytics and automation to a much greater degree in order to effectively counteract security risks.

Appropriate software solutions can help to effectively counter the exponentially growing number of threats through a

- ▶ Structure
- ▶ Classification
- ▶ Prioritization
- ▶ Systematic processing operation.

If this is not performed continuously, IT teams will only have an inaccurate overview of their environment. Failure: A cyber attack becomes only a matter of time.

This is where **DriveLock's Smart CloudServices** come into action. A security service which is managed by the manufacturer helps to free your internal resources, which can then focus on their actual task, the strategic development of the IT environment within in the company.

PRECISELY FORMULATED, YOU WILL BENEFIT FROM:

- ▶ Continuously updated DriveLock versions
- ▶ Current security profiles and expert configuration.
- ▶ Rapid deployment of security solutions for acute threats (zero-day exploits...)
- ▶ Seamless round-the-clock access to top-tier security expertise.
- ▶ Regular audits according to professional compliance requirements (BSI, Basel II, SOX, etc.)

SECURITY FROM THE CLOUD: EXPECT HIGH STANDARDS WHEN IT COMES TO YOUR DATA

As a **Managed Security Service Provider (MSSP)**, it is our objective to offer you, as our customer, the highest level of security. **DriveLock Smart CloudServices** will ensure you're on the safe side. We work with cutting edge technology and incorporate the latest security requirements into our solutions. This will ensure that **your data is protected in the best possible way at all times**. **DriveLock** adapts to your requirements: Simply select the security profile that best suits your needs, your company and corporate group environment.

This will provide you with the best performance in all areas. This is a unique service offered by **DriveLock**.

SMART CLOUDSERVICES 24/7 - NOBODY UNDERSTANDS ENDPOINT PROTECTION BETTER THAN WE DO.

With **DriveLock's Smart CloudServices**, you will utilize the proven DriveLock modules in the form of Security as a Service (SecaaS).

You can rely on a recognized industry security expert who will handle your security requirements around the clock. All of this delivered at a top-tier security level that cannot be achieved with conventional solutions.
