

For Intelligent Operations managers in Financial Services looking for precise answers from their mass of documents, DOCUMENT GENOME is the document intelligence company that enables agility and control with lower costs by making visible qualitative information and patterns hidden in countless wording variations, because DOCUMENT GENOME is the first company to sequence the document genome.

The screenshot displays the Document Genome interface with several overlapping windows. The 'ANALYZE' window on the left shows a list of tags and options to include or exclude text and tags. The 'DOCUMENT MANAGER' window at the top shows a document titled 'BlackRock Advantage ESG International Equity Fund Class I.pdf...'. The 'SEMANTIC BLOCK MANAGER' window in the center shows a list of blocks with their respective text snippets. The 'MANAGE RELATIONSHIPS' window in the foreground shows a 'Manage profiles' interface with fields for 'Profile name 1', 'Profile name 2', and 'Relationship', along with a 'Save' button. At the bottom, a table lists search results.

No	Record name	
1	18- MotaEngil_VL- Peru	515
2	16- Grupo Yobel_Peru	512
3	19- MotaEngil_Pension- Peru	488

6	17- SUNAT- Peru	408
7	3- Grupo Minsur- Peru	373
8	7- OMA - Mexico	248

GENERIC PLATFORM

- Works for any use case
- Accurate in any language
- No machine training

EASY TO USE

- Designed for business users
- Rapid training (1-3 hours)

ADVANCED INFRASTRUCTURE

- Easy deployment from Azure Marketplace
- Infrastructure-agnostic (no customization)
- Kubernetes as container orchestrator for scaling
- Helm as package manager for easy deployment
- Ability to adjust spikes in demand
- Easy to maintain through modules
