

StrongPoint

Click & Collect

GROCERY- AND RETAIL PARCEL LOCKERS FOR CONTACTLESS AND FLEXIBLE PICKUP

StrongPoint Click & Collect

StrongPoint offer retailers an E-Commerce Logistics suite with solutions run on a common platform. Our E-commerce Logistics suite includes our [Pick & Collect](#) as well as our [Last Miles solution](#).

StrongPoint Click & Collect Lockers is one of StrongPoint's Last Miles delivery modules.

StrongPoint Click & Collect lockers offers the perfect way for retailer to provide greater flexibility in the Last Mile offering – all while reducing the logistics costs and being able to offer 24/7 services. In today's world where the request for contactless deliveries grow, safe and convenient transition of goods without human interaction is crucial to meet your customers' needs.

StrongPoint offers several delivery modules where smart locker solutions is the fastest growing. The Click & Collect Lockers do cover all potential needs; Refrigerated with several cold zones, lockers for retail parcel and even a mobile version for remote locations and flexible pickup stations.

- Flexible pick-up slots

Reliable

- More than 300 Grocery lockers installed
- Running on Azure platform
- Build to withstand tough conditions inside or outside.

WHAT OUR CUSTOMERS ARE SAYING

“If there is anything I possibly regret, it is the fact that we didn’t push for the Click & Collect lockers at an earlier stage. They have been extremely good for the whole concept. There is of course an initial investment connected with the Click & Collect lockers, but compare that to buying another truck and the maintenance that would bring, and the choice is easy. And not to forget, the customers really appreciate the lockers”, says Göran Borg at Coop.
