

Gather Safely™

At Tamarin, we'll give you the tools to create a safe environment and be protected against COVID-19.

COVID-19 has wreaked havoc on our lives and businesses. But, there is a way to reduce risk and create the safest environment for people to gather, anywhere. There are many ways we can help you protect whoever you are helping to gather - it is up to you to decide what works best for your needs. A combination of symptom screening and test coordination for any of your users will create the safest environment - this is possible with each plan.

Whom should you include in your COVID-19 Gather Safely™ Plan?

It is important to consider the demographics and potential health status of your guests. We know that COVID-19 does seem to affect disproportionately across demographics such as age, health status, and even race. Children can also carry SARS-CoV-2, so you want to take that into consideration, even though there is evidence mounting that they may not transmit the virus as effectively as adults do. In short: for your plan, you should consider everyone that is gathering.

3 Gather Safely™ Options

1 Gather Safely™ Free
Cost: Free; Optional: \$8.99 per validation

Rely on the Gather Safely™ badge to know the status of anyone at your event. With the Free version, your guests can use their “Symptoms Clear” or “Test Requested” upon entry. This badge is automatically created when they complete and attest to their Symptom Survey in the platform. If someone’s badge says “Test Requested”, for the utmost safety of everyone, that individual should be tested for and receive their diagnosis of COVID-19 before attending any event. If positive, they must quarantine. Please note that without a test, you do not know whether asymptomatic and presymptomatic people are positive with COVID-19.

Test Validation: \$8.99 per validation

After your guests receive their test result, they can upload it to their profile, and we will validate it. They will then receive a badge for “Quarantine” or “Tested: Clear”. Third party validation brings peace of mind when you’re trying to create the safest environment possible.

2 Gather Safely™ Plus

Cost: \$12 per admin account per month

Dashboard: See and maintain all Gather Safely™ badges in one simple dashboard. It's easy to categorize by groups and view information over time, for every event.

Unique URL: All your guests register using your unique URL. This adds them to the dashboard and their Gather Safely™ badge status is updated in real time.

Test Validation: \$8.99 per validation We'll validate test results uploaded to any profile under your unique URL, which will update the badges in your dashboard to "Quarantine" or "Tested: Clear"

Status	First Name ↓	Last Name	Date Updated	Date Registered
Tested: Clear	Zack	Toole	06/05/2020	06/05/2020
Symptoms Clear	Sanjit	Tanguli	06/05/2020	06/05/2020
Tested: Clear	Michael	Wilson	06/05/2020	06/05/2020
Test Requested	Michael	Rich	06/05/2020	06/04/2020
Tested: Clear	Mark	Brown	06/05/2020	06/05/2020
Test Requested	Maria	Cortez	06/05/2020	06/05/2020
Quarantined	John	Strotham	06/05/2020	06/05/2020
Symptoms Clear	Jill	Miller	06/05/2020	06/05/2020
Symptoms Clear	Jenni	Baxter	06/05/2020	06/05/2020
Symptoms Clear	Jackson	Miller	06/05/2020	06/05/2020

Dedicated support to help you create the safest environment while you focus on the other, more important details

Gather Safely™ Pro

Cost: Adjustable based on your needs

3

The Gather Safely™ Pro is full-service support to help you create the safest environment possible. Pro is a combination of a platform and services:

- Platform Features for Pro Users:
 - Symptom screening and Gather Safely™ badge
 - Securely upload and share test results - from any testing site (we do not do testing)
 - Administrative and Aggregate dashboards for simple, efficient operations management
 - Data immutability: stored in a way that cannot be deleted or changed by any one, even Tamarin
- Services for Pro User:
 - Customized compliance program based on your Federal, State, and Local requirements for operating safely
 - Testing coordination based on health insurance or uninsured reimbursement
 - Validation of test results for each user, regardless of testing location

In Summary

Risk is reduced and safety increases when as many guests are tested as close as possible to the event, regardless of which plan you use. We give you the tools to create the safest environment, no matter whether you choose Free, Plus, or Pro.

On Data Immutability

Know with certainty whether data was altered or deleted. This is crucial from a compliance perspective. We achieve this by using our own proprietary hashing process to our own healthcare-safe blockchain protocol. Data is hashed upon entry in the dashboard. Data can be compared and if it matches, data was not altered; if it does not match, data was altered. This means you have verifiable proof of data such as time stamped surveys, temperature checks, and test results.
