

Microland SmartWorkspaces with Azure Virtual Desktops (AVD) Solution

Secure Remote Desktops & Apps with Microsoft Azure Virtual Desktop (AVD) for modern workspaces

NextGen Workspace Solutions for a New Era of Business

Today's workforce is constantly connected, and expectation is that the technology they use at work needs to be at least as flexible, functional and mobile as what they use at home. But the stakes are higher than simply meeting the elevated expectations of workforce. A NextGen "digital workspace" technology can help enterprise improve business agility and workforce productivity.

Microland SmartWorkspaces eliminates the complexity of traditional hosted solution by offering fully managed, secure, consistent and high-performance workspaces to end users on any device, anytime and anywhere. You no more have to think about all the complex moving parts of the traditional hosted solution, you heard it right! leave it to us, Business can now focus on transformation and higher value activates rather than managing complex infrastructure.

With Microland SmartWorkspaces solution, organizations seamlessly access Azure Virtual Desktop (AVD) offering, which includes professional services for virtual desktop and apps, as well as our world-class managed services support. Our highly flexible solution comprises of AVD Native control plane as well can be integrated with Citrix / VMware Horizon Cloud for supporting hybrid models. Ultimately, organization decides the management plane(s) of choice based on their business and technical needs and our solution is dictated by the organization needs.

Enabling Flexible, Functional and Mobile Workspaces

Microland SmartWorkspaces address the following scenarios:

1. Brand new virtual desktops and apps service on AVD with flexibility to choose AVD Native, Citrix Cloud or VMware Horizon Cloud management planes.
2. Modernize traditional hosted virtual desktop and apps solution by moving to AVD
3. Hybrid deployment using AVD with Citrix or VMware Horizon Cloud services
4. Manage Win 7 End of Support with AVD
5. Azure Virtual Desktop proof of concept project

Microland's phased approach for moving to AVD

1. **Assessment** - Readiness Assessment that focuses on analyzing enterprise user's fitment & IT's readiness to adopt, deploy and manage AVD ecosystem.
2. **Design** – Design Simple, Secure and Scalable AVD environment.
3. **Deploy** – Deploy Hostpools, FSLogix and MSIX App solutions based on identified personas.
4. **Rollout** – Phased user onboarding to the AVD environment.
5. **Manage** - Monitor and manage the health of the solution as well as continued optimization.

Why AVD

Delivered Virtually

Azure virtual desktop is the only service that delivers simplified management, a multi-session windows 10 experience, optimization for O365 applications, and support Remote Desktop Session Host (RDSH) desktops and apps. With Azure Virtual Desktop, you can deploy and scale your Azure virtual desktops and apps in minutes and get built-in security and compliance features.

Business Benefit from:

1. **Best User Experience** – The only multi-session Windows 10 environment along with optimized O365 Application suite
2. **Superior Economics** - Simplified licensing and labor savings by moving from IaaS to PaaS
3. **Enhanced Security** – AVD delivers enhanced security with Azure AD integration, reverse connect technology, and deep integration with the security and management of Microsoft 365.
4. **Simplified Management** - Most flexible service allowing you to easily virtualize both desktops and apps
5. **Free Win 7 ESU** – Get free extended security updates for Window 7
