

We help enterprises identify, resolve overpayment issues and Missed Discounts by leveraging the power of Artificial Intelligence

“Today organizations are losing upwards of 4% of their bottom line.”

Enterprises are unknowingly **losing millions of dollars** due to **overpayments & revenue leakages**.

Typical areas where companies found discrepancies in **Accounts payable claims, Inappropriate Payments, Statement credits, pricing errors, missed cash discounts, and miscalculated rebates**.

Discover Dollar resolve helps enterprises immediately identify, monitor & resolve these revenue leakages with the support of inbuilt automation & alerting features by seamlessly integrating with the complex ERP systems.

Companies can achieve the 4x ROI and potentially **mitigate risk** regarding Leakages and overpayments.

Structured Data

Unstructured Data

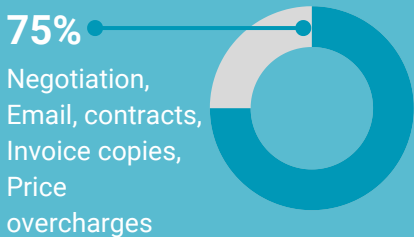

Data isn't always organized

Only **25% of business data** has value for P2P, Inventory, ERP & Vendor masters, while the remaining **35 to 45%** is active business data produced every day. (Source)

An average SME generated over **450 invoices** and had a **1.29% invoice** duplication rate, or around **6 duplicate** invoices each month.

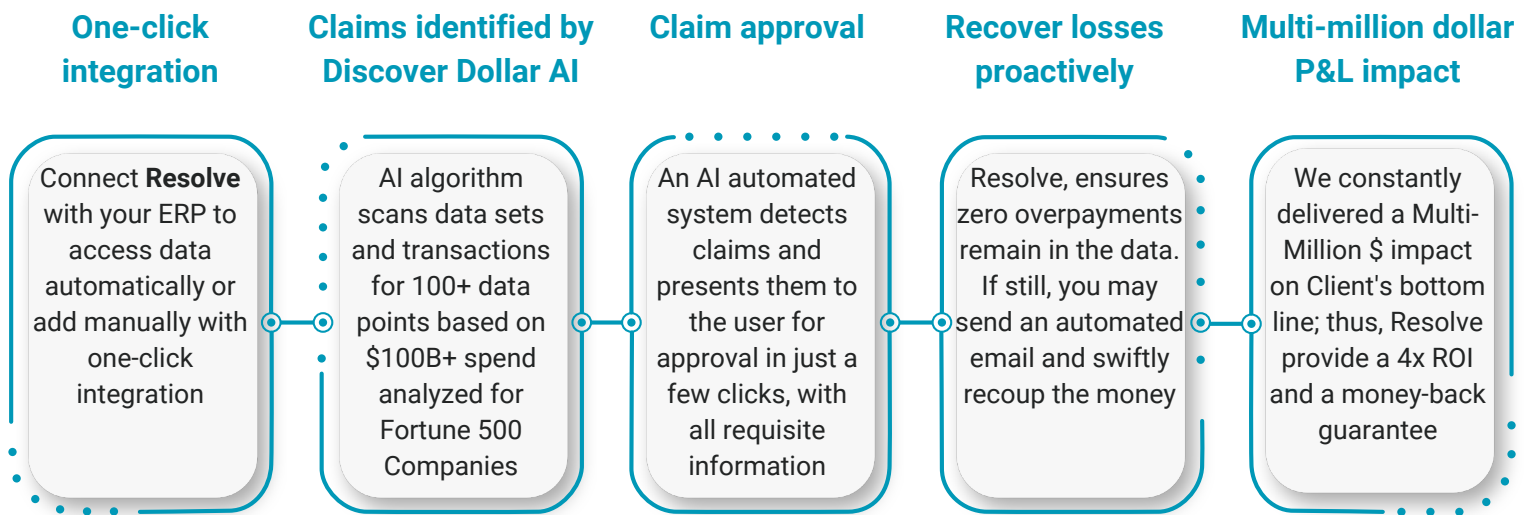

The average cost of a duplicate invoice is **\$2,034**. A total outlay of **\$12,000** per month may be expended if each duplicate invoice is paid by mistake.

Higher the company's size, the more leakage there is.*

How Resolve Bring Value From 75% Unstructured Data

Day-to-day procurement, invoice, and promotion issues are pushing many businesses to seek a solution that will help them manage unstructured data, gain control and insights.

The Potential Benefits Of Resolve

Organizations can gain sustainable benefits from Resolve in unstructured data, including-

Curbing losses by consistent improvement in leakages reduction

Increased productivity of your team by 10x

Improve bottom line by up to 4 percent of revenue

Improving cash flow by capturing the leakages and preventing from avoidable losses
