PROCEDURES.

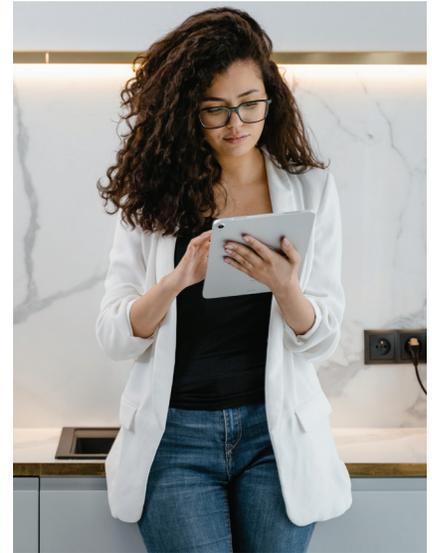

POWERING TRANSFORMATION

WHAT IS RESERVATION APP?

The business landscape has evolved ever since the initial outbreak of the COVID-19 virus. Whereas remote work used to be a luxury only afforded to key personnel, today's work-at-home reality pushes the IT world to adapt to the ever-evolving needs of its users.

Although Global Brands Group prides itself on its impressive list of solutions and offerings to organizations of all scales and models, we can never have too many safeguards against the spread of infection, as well as unnecessary resource utilization. To that end, Global Brands Group presents its newest Power App with full Microsoft Teams integration: Reservation App.

Reservation App allows authorized staff to remotely book their office space and desk needs should access to the office be required. A fully automated and continuously updated solution, Reservation App helps users organize their space and time needs, easily check availability, and receive institution-wide updates regarding closures, emergencies and confirmations.

RESERVATION APP BENEFITS

There are a host of benefits with relying on Reservation App for your on-site access needs.

- Always-on scheduling and reservation system with an intuitive interface.
- Full Microsoft Teams integration for maximum workspace efficiency.
- Book rooms and office space remotely using your own device.
- Controls spread of possible infection with contactless service from start to finish.
- Site-wide alerts for compromised office space, closures, conflicts and approvals.

WHY RESERVATION APP?

Your organization deserves to enjoy peak safety and security at all times, especially when it comes to on-site work. Reservation App fills many gaps in the safety chain of any organization's operations.

- Reservation App is a contactless service for peak safety and security.
- Reservation App helps limit the spread of infection via assigned spaces.
- Reservation App is a cost-effective and user-friendly application for peak efficiency.
- Reservation App is serviced by Global Brands Group's qualified service teams.
- Reservation App is a clear and concise application for the modern workforce.

WHY GLOBAL BRANDS GROUP?

As the region's leading catalyst and agent of change in the Information Technology sector, Global Brands Group is dedicated to providing organizations of all sizes and backgrounds with the world's leading IT services and solutions.
