weavix® equips every worker with a rugged, purpose-built communication performance through disruptive innovations in the value of your workforce and strive to improve their productivity management solutions throughout your facility.

weavix® creates a collaborative ecosystem for your streamlined communications for every worker and transforming how we keep workers safe and connected.

With walt® connecting the frontline to the operational ecosystem, Enablement: walt® the Key to Frontline Company Overview

What is weavix?

Founded in 2018, weavix® aims to disrupt the status quo to optimize frontline work through communication technology. Historically, new technologies have had limited deployments for frontline workers, focusing primarily on things rather than people. As the Internet of Workers® platform, we understand data acquisition can happen when every frontline worker is equipped with the digital tool they want to use – walt® Smart Radio.

The Internet of Workers Platform

The weavix® Internet of Workers® platform is the premier plug and play solution used to connect your workforce in a secure environment that scales alongside your corporation.

The Frontline Worker Greatest Resource:

Focusing on People. Not Things.

Enabling your workforce part of your competitive advantage with faster speeds and impact on the frontline workforce. As your global partner in frontline enablement, we’ve gone the extra mile to make set up hassle-free – walt® Smart Radio.

The Internet of Workers® platform is built to connect and support your frontline workforce.

weavix® is the preferred platform for private cellular, giving you secure, reliable communications tailored to your enterprise.
