Market Research

# Multi Cloud Adoption - 451 Research

# FinOps Foundation Framework

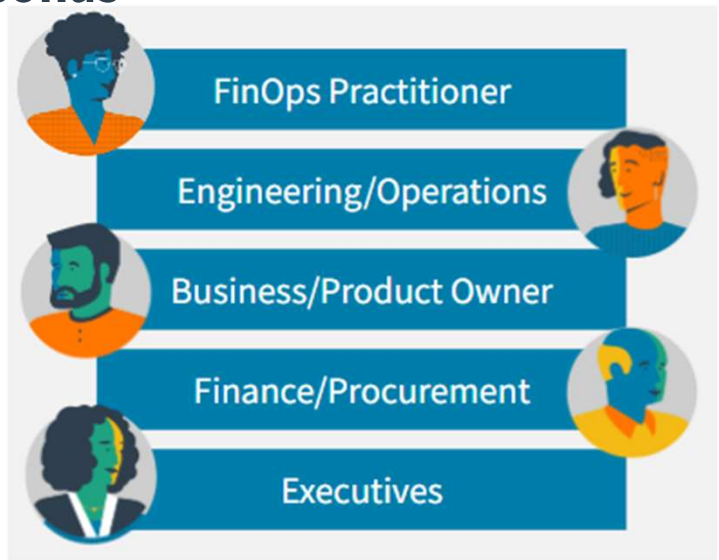

**Definitions** FinOps is an evolving **cloud financial management discipline** and **cultural practice** that enables organizations to get **maximum business value** by helping engineering, finance & business teams to collaborate on data-driven spending decision

## Principles

- Teams need to collaborate
- Everyone takes ownership for their cloud usage
- A centralized team enables FinOps
- Reports should be accessible and timely
- Decisions are driven by business value of cloud
- Take advantage of the variable cost model of the cloud

## Personas

## Phases

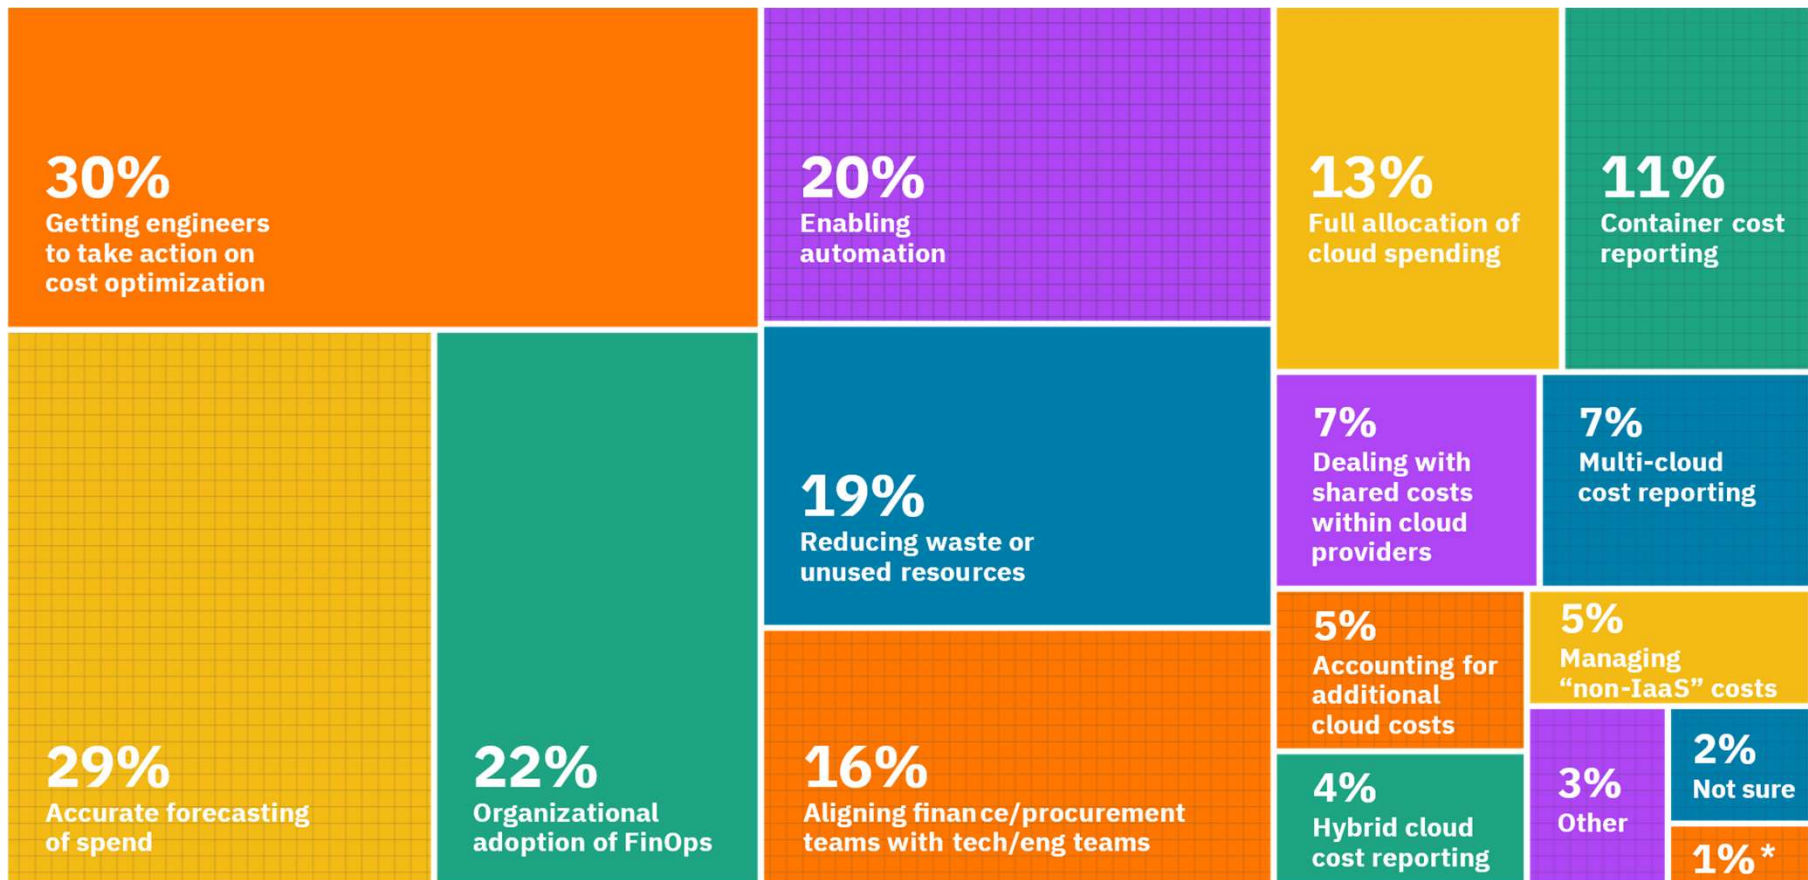

## Domains & Capabilities

## Market Opportunity & Competition

# Cloud Cost & FinOps Challenges

\*Multi-currency cost reporting

# Top FinOps Practices to Manage Cloud Cost

**Monitor & Track  
Cloud Spend from  
Single Pane**

**Implement Cost  
Optimization**

**Automate Cost  
Management**

**Control Cost at  
the Granular level**

**Leverage Cloud  
Cost Forecasting**

**Implement  
Resource  
Allocation  
Strategies**

**Invest in Cloud  
Cost Governance**

# Heeddata Vision

**Solve the Multi Cloud Infra Challenges for Enterprises via single plane of glass in the Multi-Cloud Era, so that enterprises can focus more on the business and innovation without having to worry about Cloud Cost Management & Optimization, Cloud Security, Cloud Operations & Compliance, Cloud Infra Workload Management.**

# *Environmental, Social, and Corporate Governance (ESG)*

**Your investment on Heeddata indirectly supports ESG & Sustainability Goals of your Organization**

**Data Centers Cause ~3% of Carbon Emissions**

ESG and CSR are both ways that businesses can demonstrate their commitment to sustainable business practices. CSR can be seen as the idealistic, big-picture perspective on sustainability, and ESG as the practical, detail-oriented perspective

# Heeddata – A Complete Multi-Cloud Cost Governance Tool

The screenshot displays the Heeddata dashboard for 'Your Company'. The main section, 'Expenses of Your Company by Cloud', shows a total expense of \$17.04 M for the selected period and \$18.01 M for the previous period. A bar chart breaks down expenses by month from Jan,23 to Apr,23, with a legend for Oracle (red), AWS (orange), Azure (blue), and GCP (green). A donut chart below shows the percentage distribution of expenses by data source: Oracle (35%), AWS (25%), Azure (22%), and GCP (18%).

Cloud Provider	Percentage
Oracle	35%
AWS	25%
Azure	22%
GCP	18%

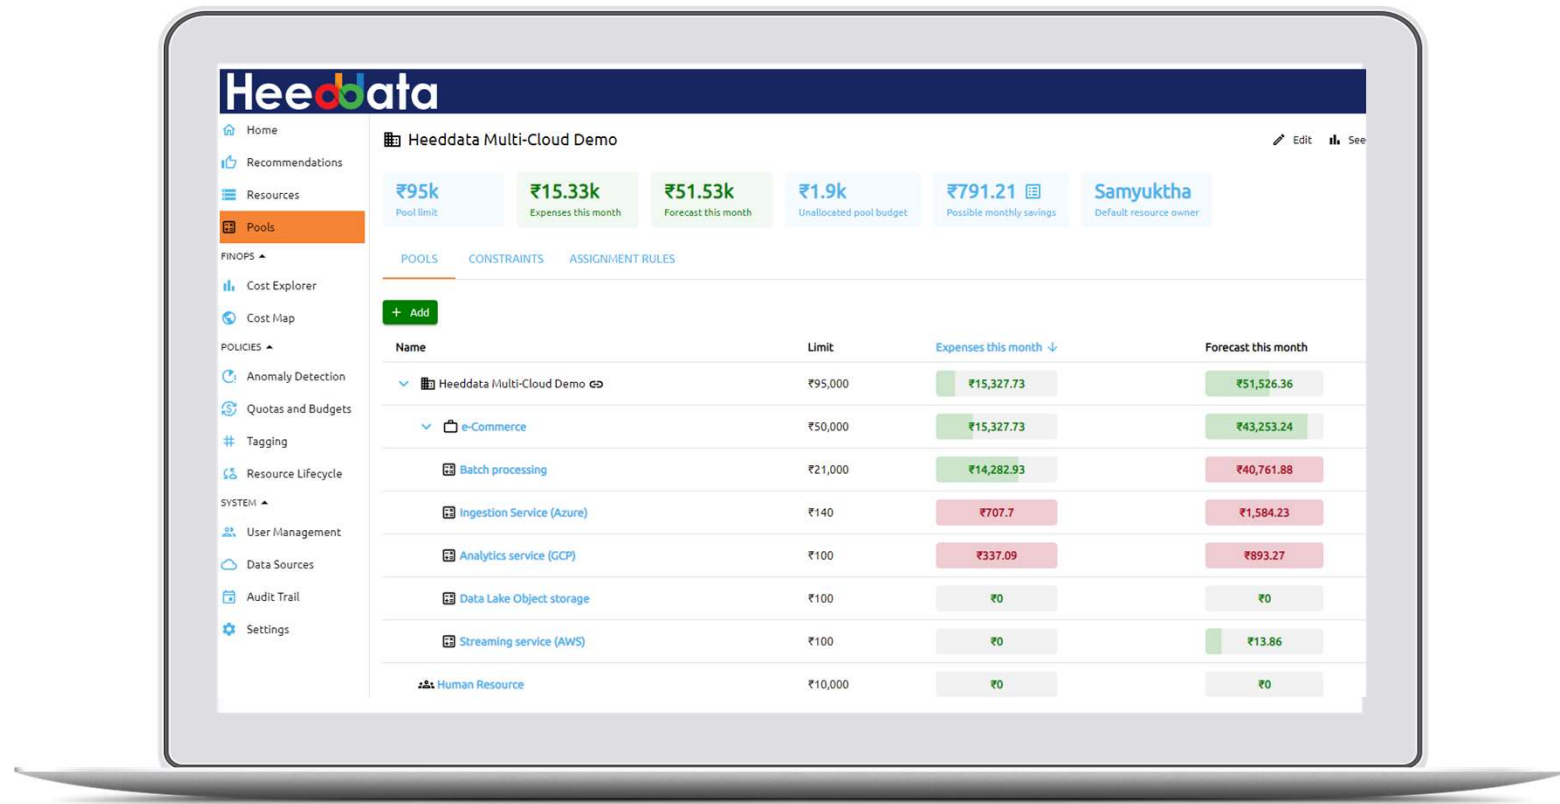

# Heeddata Features

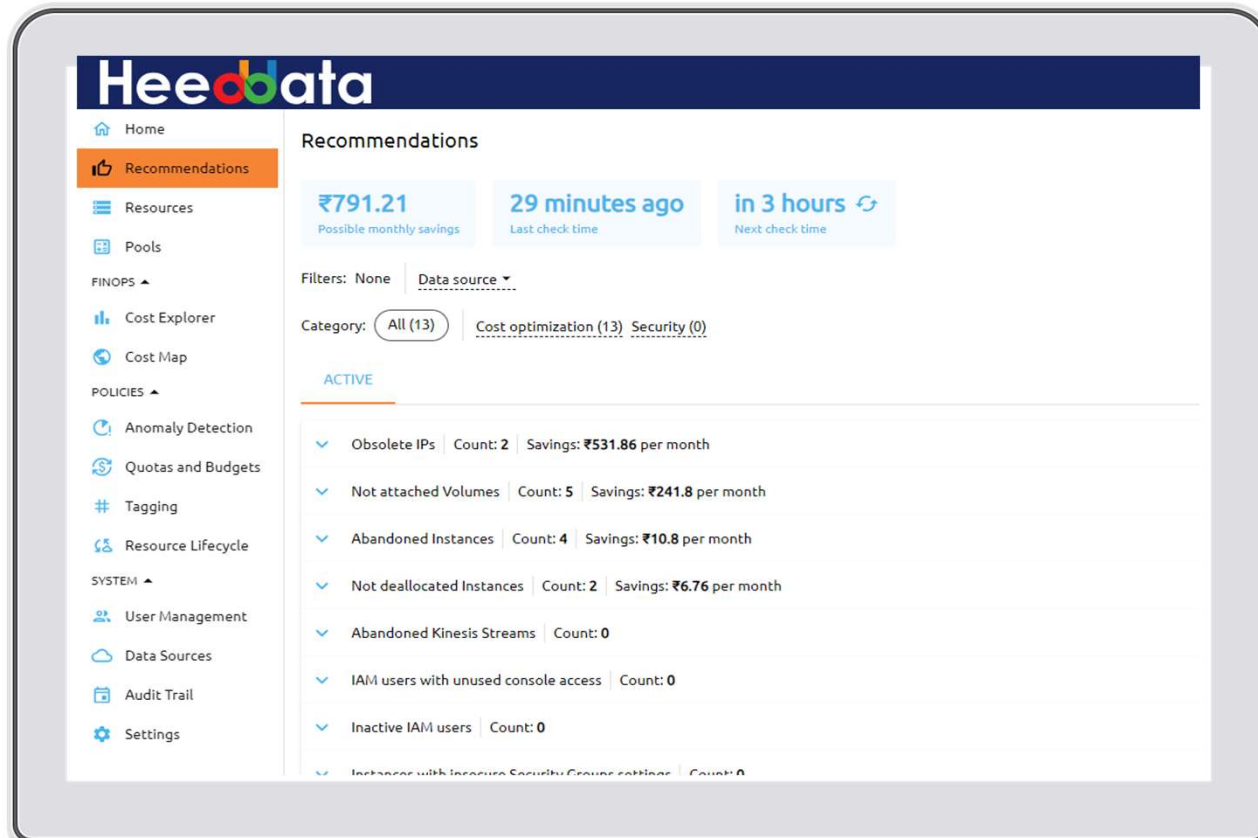

- ✓ **COST EXPLORER**
- ✓ **Manage Cost at Project /Team/Dept/Business**
- ✓ **AI/ML Cost Optimization Engine**
- ✓ **Forecast & Budgeting**
- ✓ **Control Cost @Resource Level**

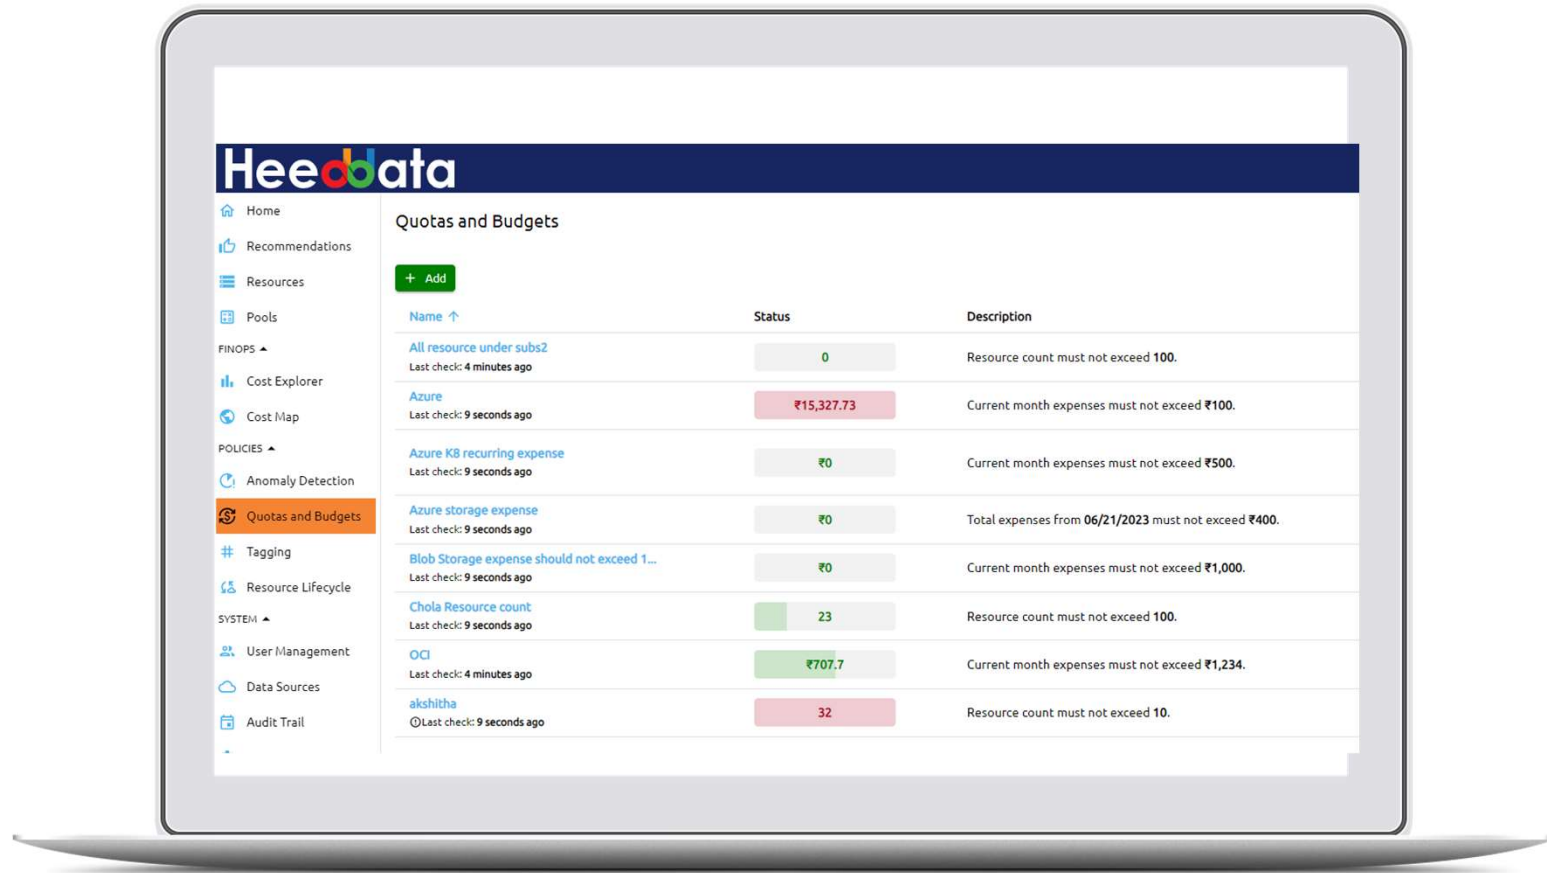

**INFORM** : Single window to track project or business owner or application cost, in spite being spread across all the clouds.

# OPTIMIZE : Single window to optimize cost for all the clouds.

**OPERATE** : Continuously re/evaluate objective, re/validate metrics & re/analyze trends to control the cost.

# How are we Different?

- ✓ **Multi-cloud and Multi-Tenancy**
- ✓ **Full Usage from Day 1 as against to Standard 90 days**
- ✓ **Geo Map**
- ✓ **AI/ML Optimization Engine**
- ✓ **Cross-Device Compatibility**
