

VIDEO OPTIMIZATION

Maximize video reach, quality & consistency

Your messaging is perfect—your video experience should be too. Take control with minimal configuration, distributing HQ video across thousands of devices.

HIGH QUALITY

High-quality video for everyone

Deliver high-quality video to everyone, everywhere at the highest possible bitrate — regardless of viewer location or network infrastructure.

P2P DISTRIBUTION

Built on existing infrastructure

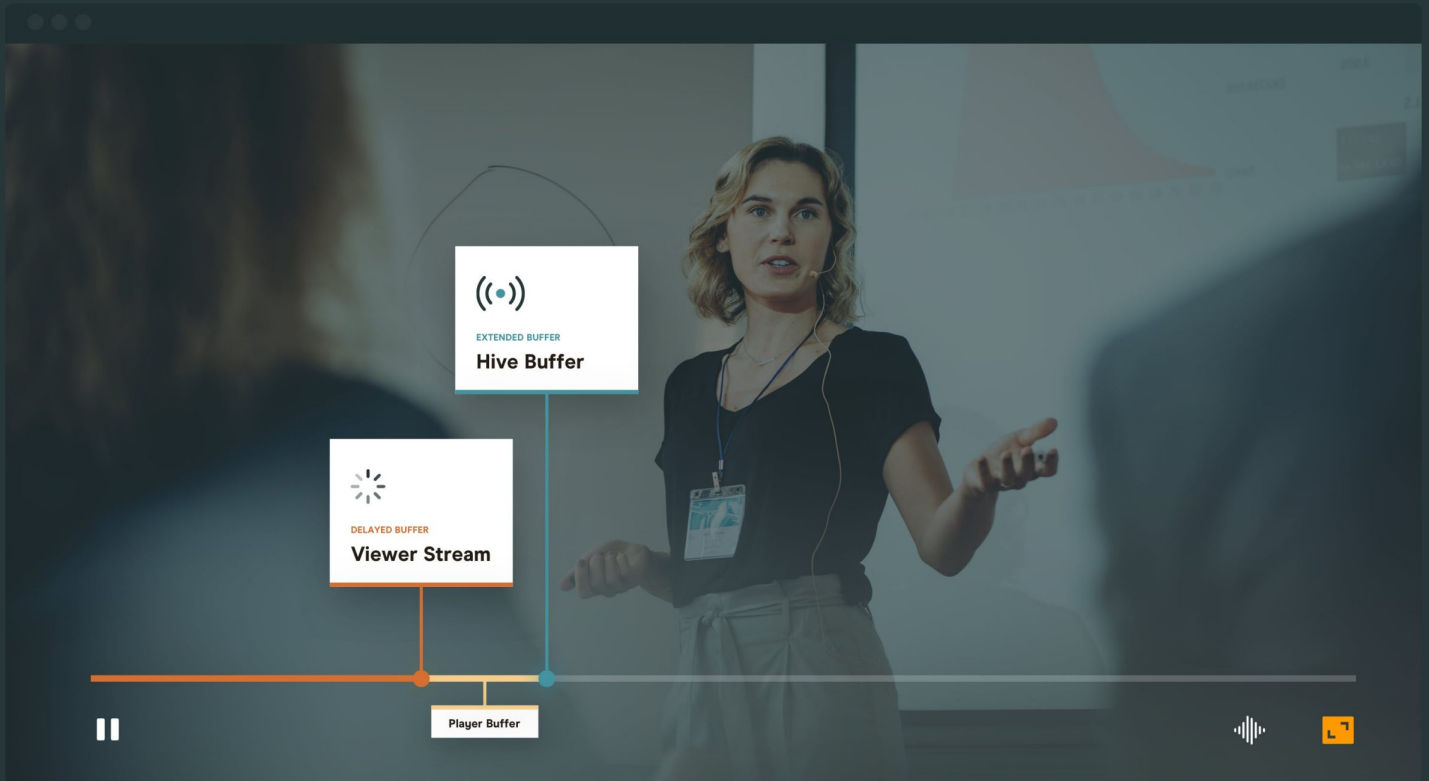

Broadcast live video without fluctuation in quality, managed by our self-learning algorithms. Once set up, peer-to-peer requires no further configuration.

STREAMING PERFORMANCE

Uninterrupted viewing

Hive's predictive CDN pre-fetching technology helps viewers build up an extended video buffer, which protects them from quality problems that can arise if the network suddenly becomes congested.

WebRTC

For the fastest video access, stream to any compatible browser without compromising on quality.

Installed

Get granular analytics and greater control over tests and caps with our native client.

QUICK START

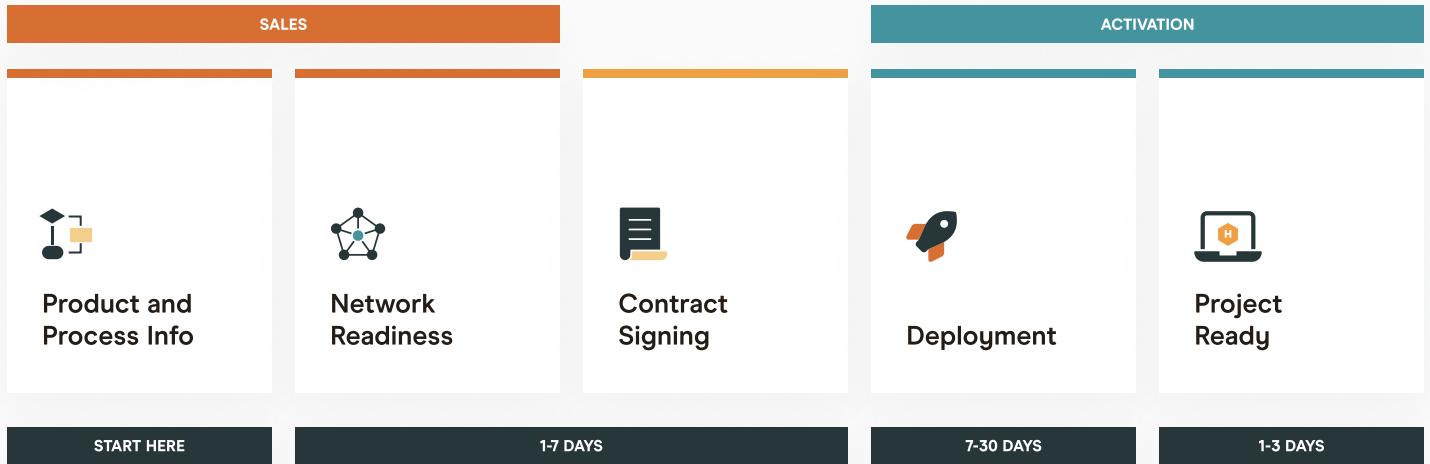

Integrating Hive is friction-free

Stream flawlessly on your existing enterprise video platform without time-consuming configuration. Hive intelligently detects and connects to existing protocols to deliver high-bitrate video evenly across any network.

ONBOARDING

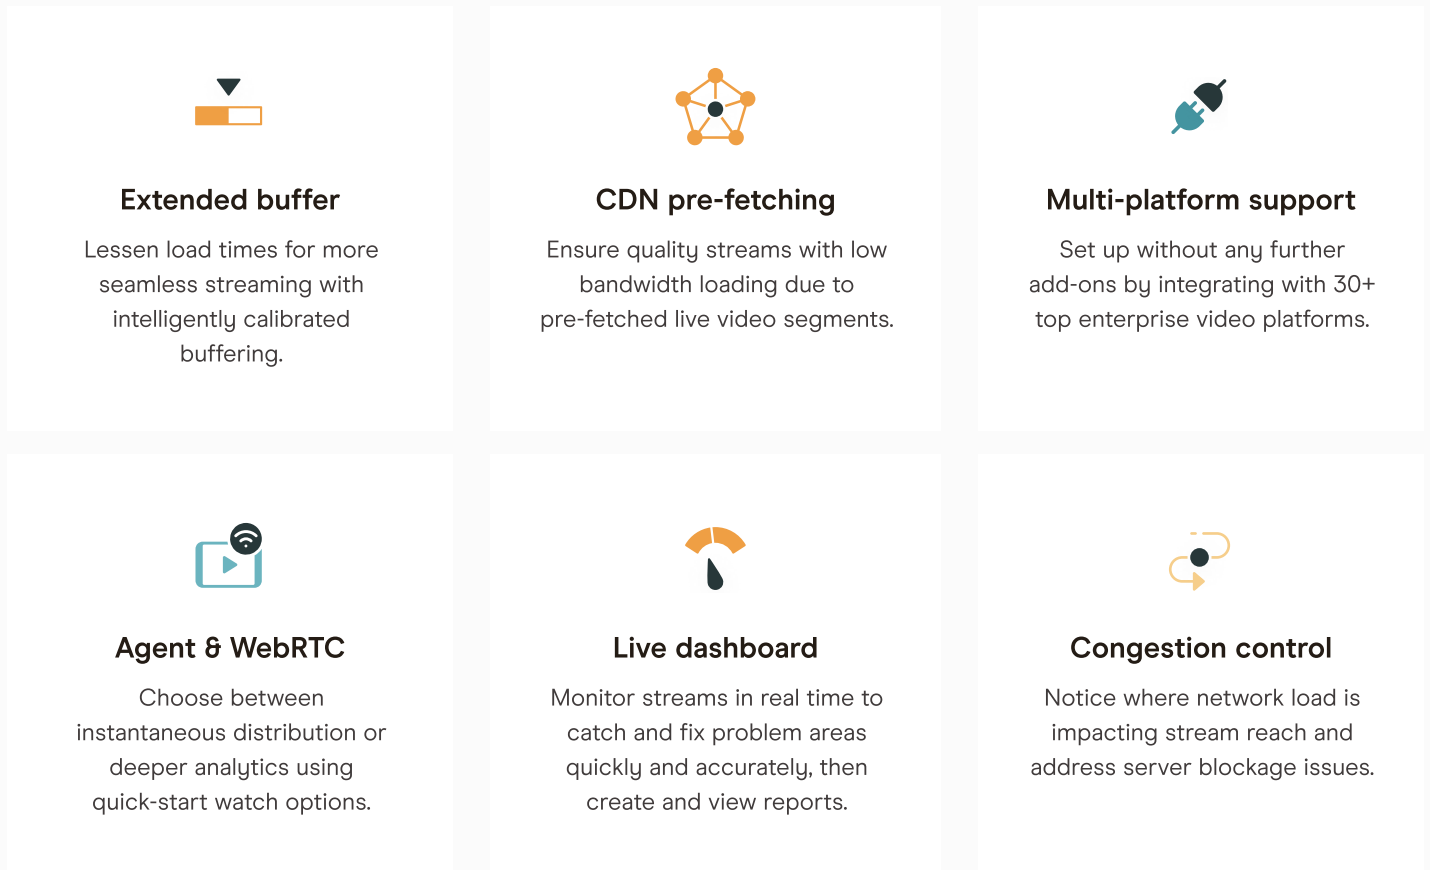

Fast and simple activation and onboarding

Our dedicated Customer Success team is ready to get you up and running with Hive in a matter of hours. While rolling out the Hive Agent is incremental, WebRTC doesn't require anything but a browser.

Discover how our products work together

Create a seamless live video experience with three core products that work independently or in tandem.

Nothing to steal

Hive stores no sensitive data, including video data, PII, credentials, customer or partner information. It's all safe behind your own firewall.

HIVE LABS

Our platform is an investment in your future

For years, our dedicated in-house R&D team at Hive Labs has been conducting intensive market research—resulting in 130 streaming technology patents that keep Hive products innovative far into the future.

We are very happy with our decision to deploy Hive Streaming. The results are beyond our expectations and, as a result, we are confident in Hexion in embracing video communications internally leveraging Office 365 and Microsoft Teams.
