

Clairvoyance Foundation & Assistants

The Cornerstone of Your Generative AI Solutions

Clairvoyance Foundation is the baseline accelerator that enables your generative AI solutions to become a reality. It is an open platform designed specifically to facilitate the building of generative AI solutions, and it can be configured specifically for your environment.

What You Get With Clairvoyance Foundation

Leverage our expertise and **accelerate your AI deployment by more than 3 months**. The Clairvoyance Foundation platform allows you to bypass the tactical groundwork, and experience your AI transformation - increasing **speed to market**, **enhancing innovation**, and **improving user experience**.

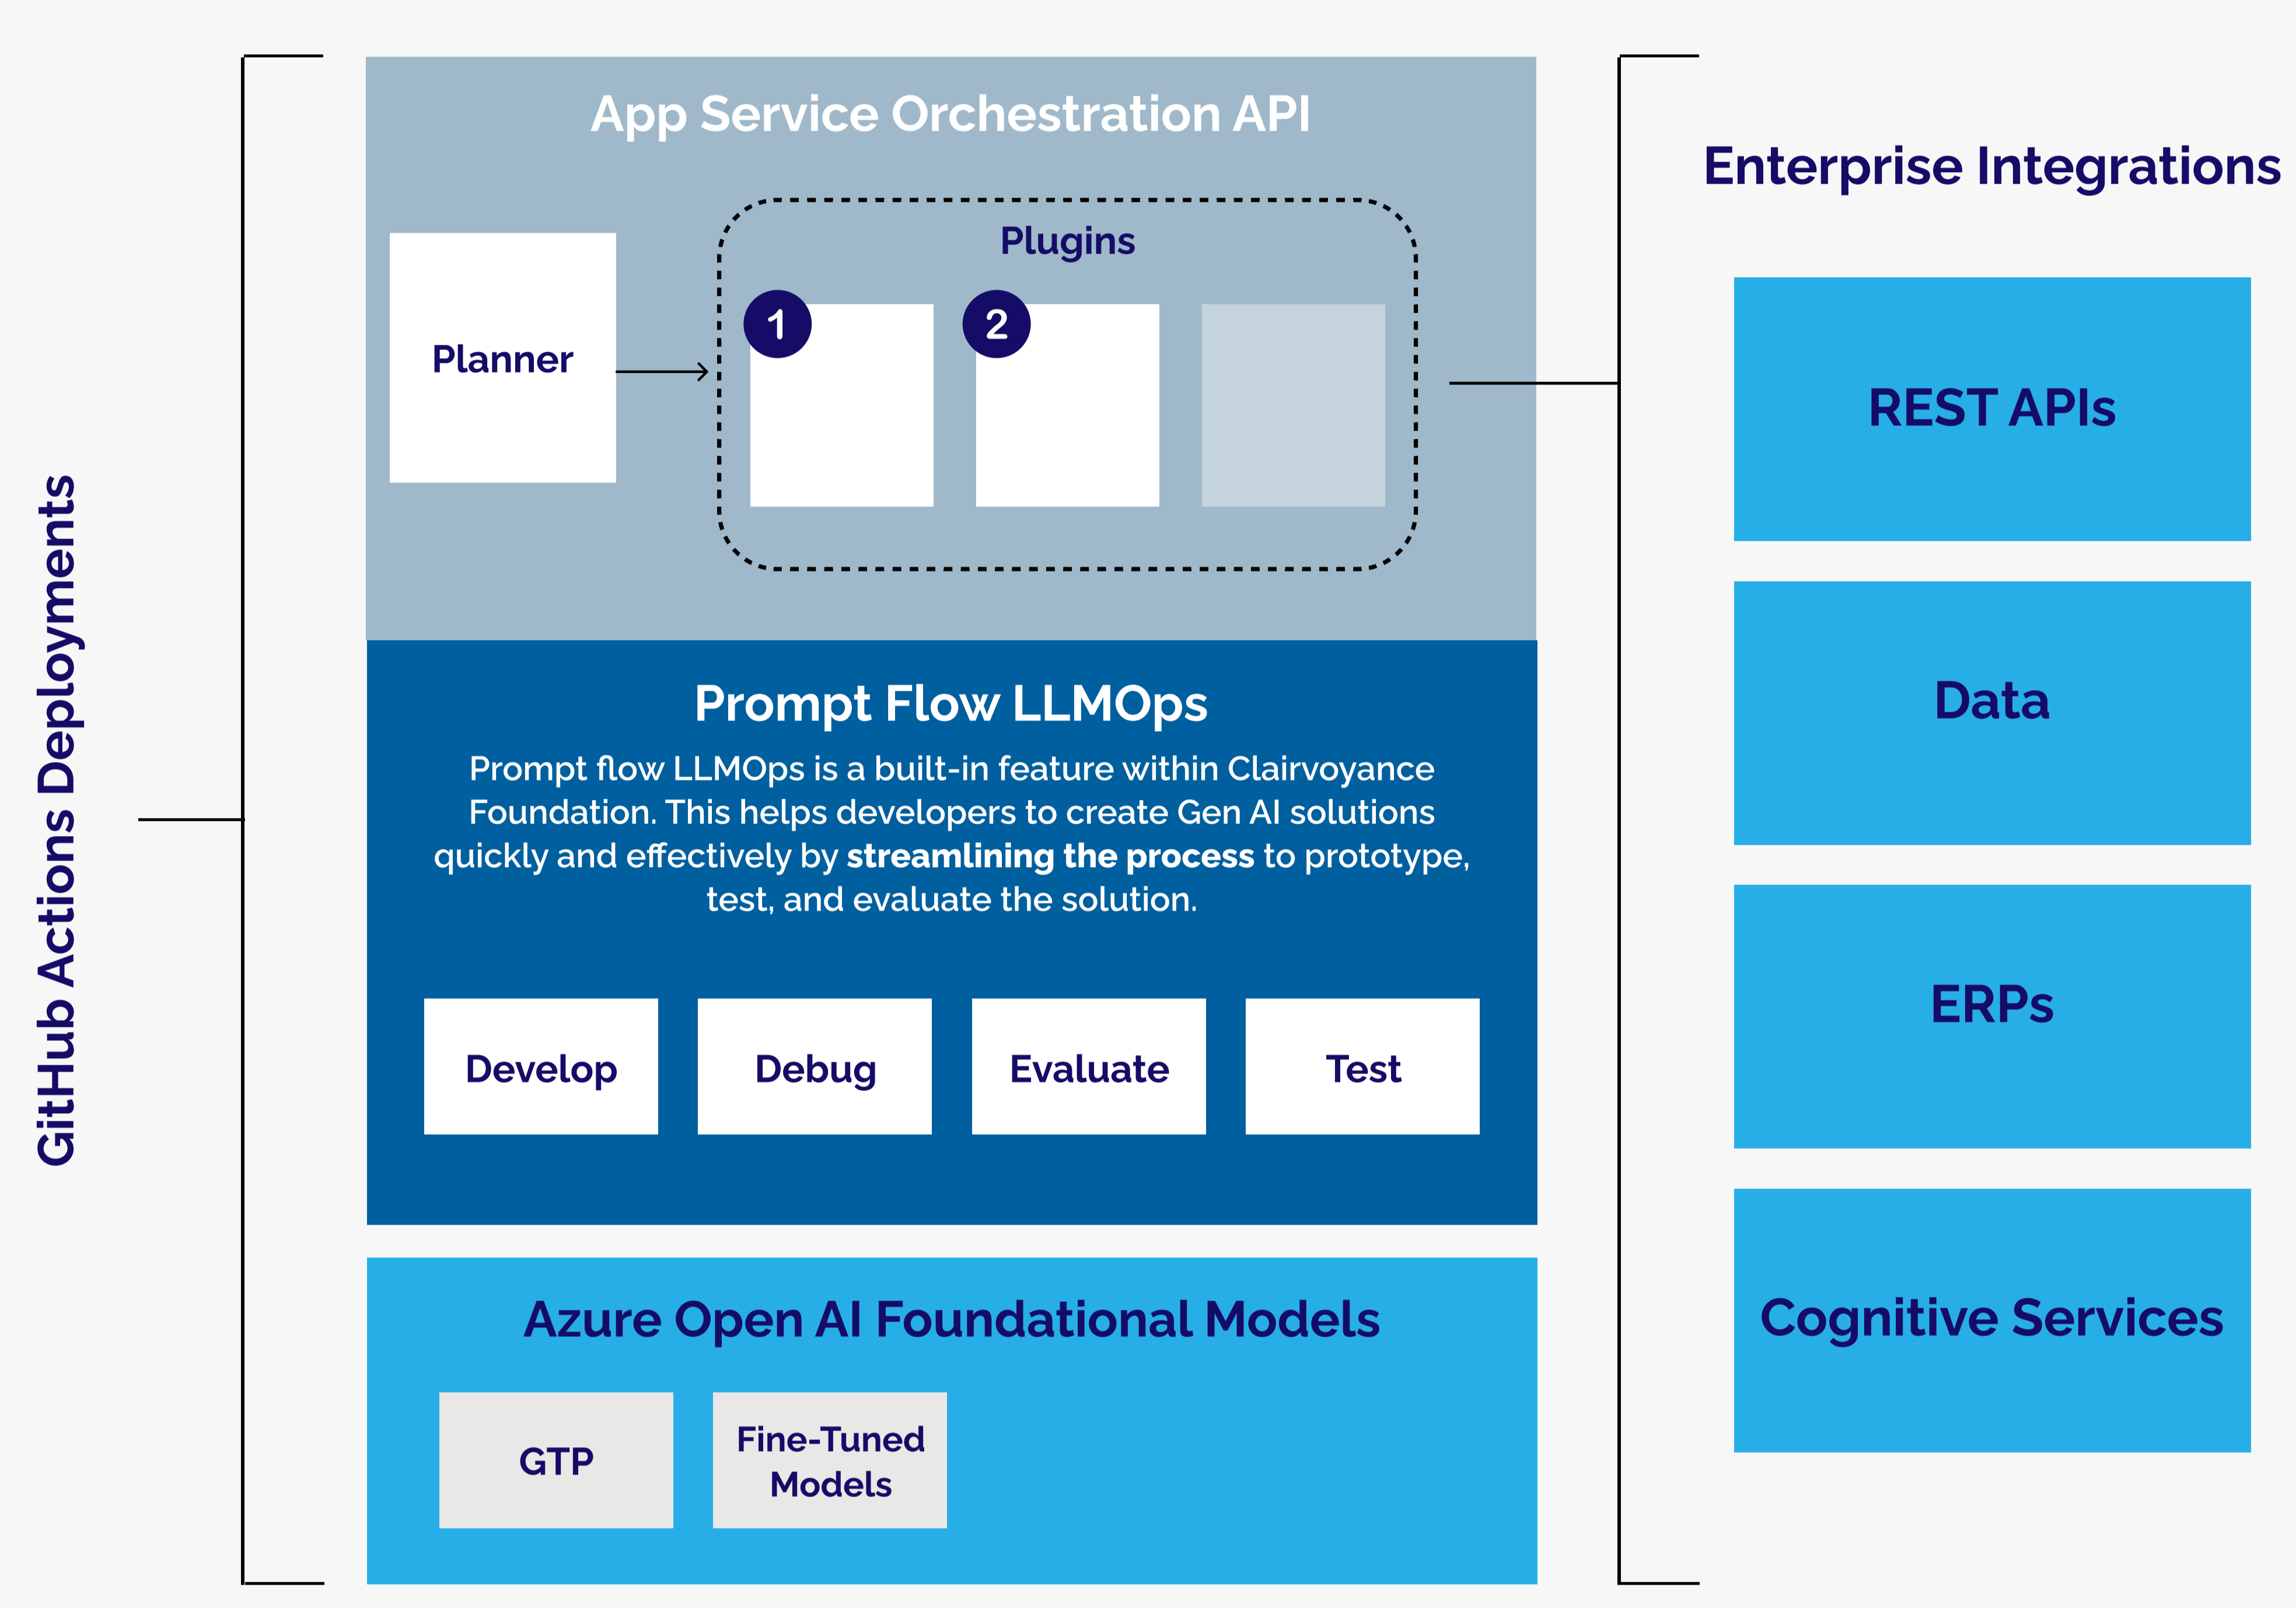

Other Areas Where Clairvoyance Foundation Can Be Implemented

Automation
Optimize your internal operations through intelligent automation. Many workers spend over **40% of their time on repetitive tasks**. AI automation can help you focus on what matters.

Managed Services
Empower your systems and solution support teams to work faster and smarter. Through AI-powered managed services, we helped one of the largest retailers of diamond jewelry increase their app support capacity by **25% and more**.

How It Works

Clairvoyance Assistants Accelerator

Build intelligent, generative assistants for your enterprise and your customers.

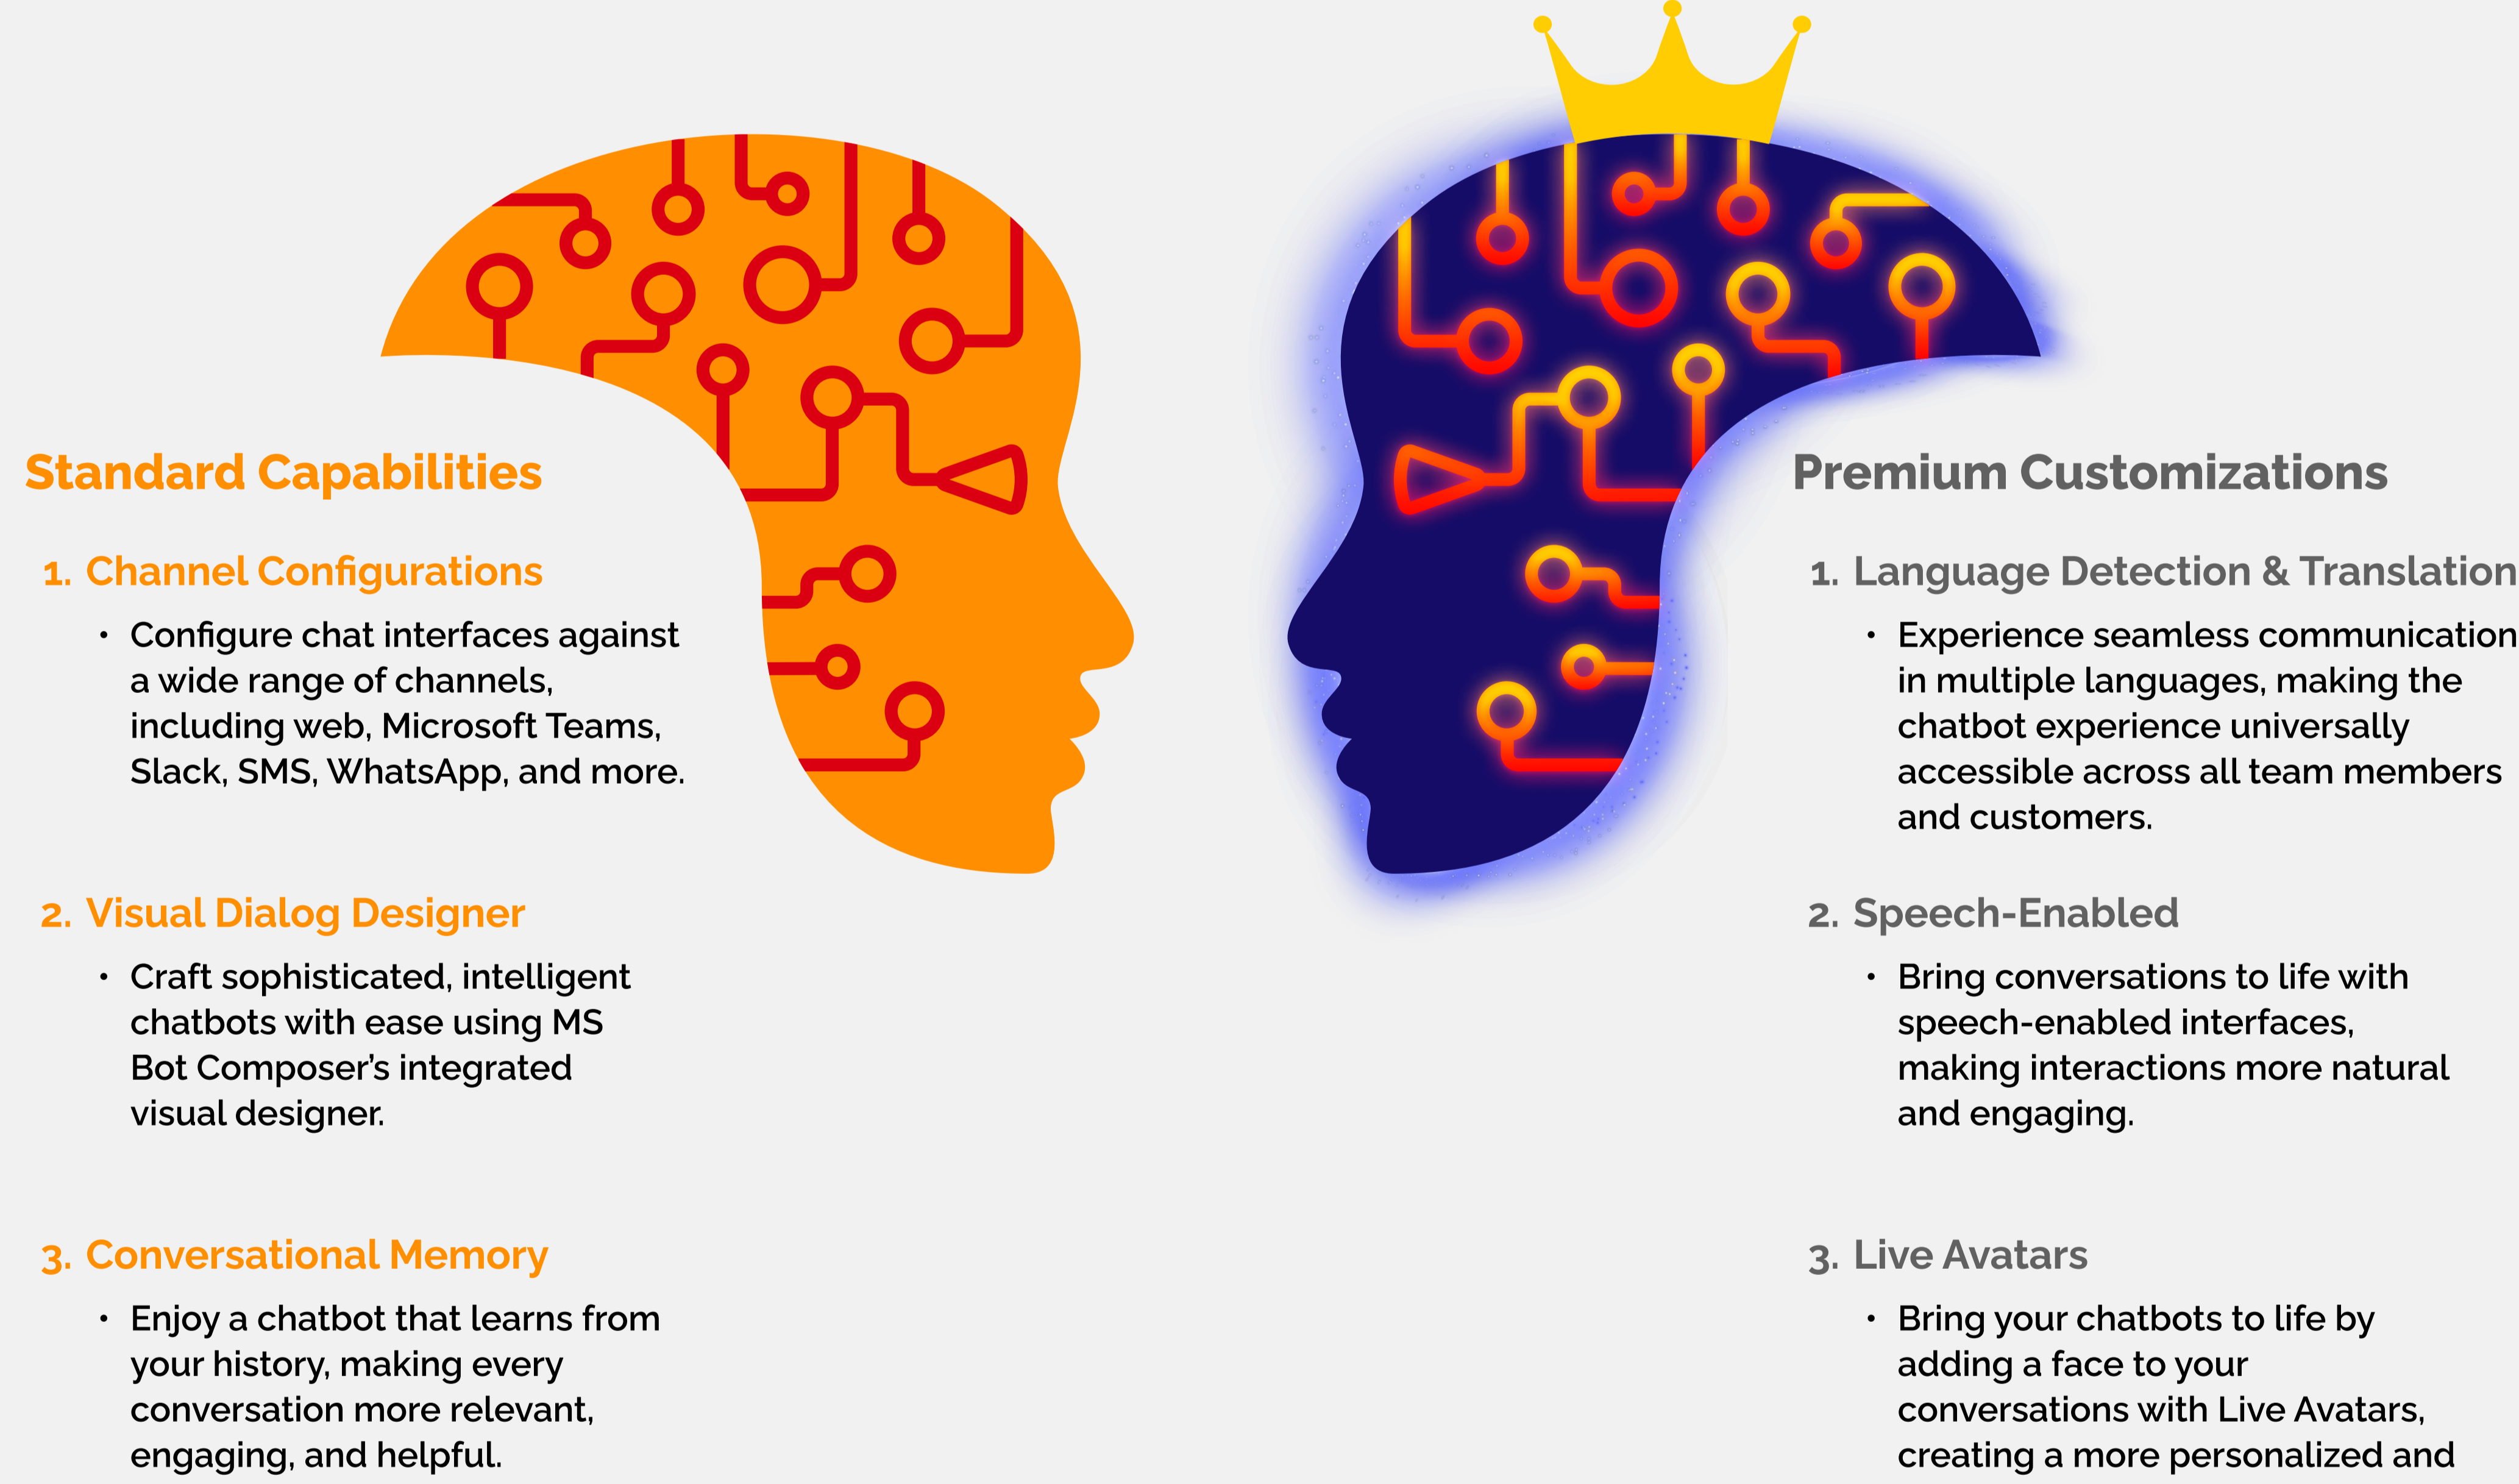

This accelerator is your precursor to many Generative AI Assistants, allowing you to **increase speed to market**, while **ensuring proper governance**. Built on top of Clairvoyance Foundation, Clairvoyance Assistants can enable:

Enterprise Assistants
Empower your employees with intelligent personal assistants designed to drive productivity. **77% of organizations** are already using or exploring AI as a means of improving their business processes (IBM).

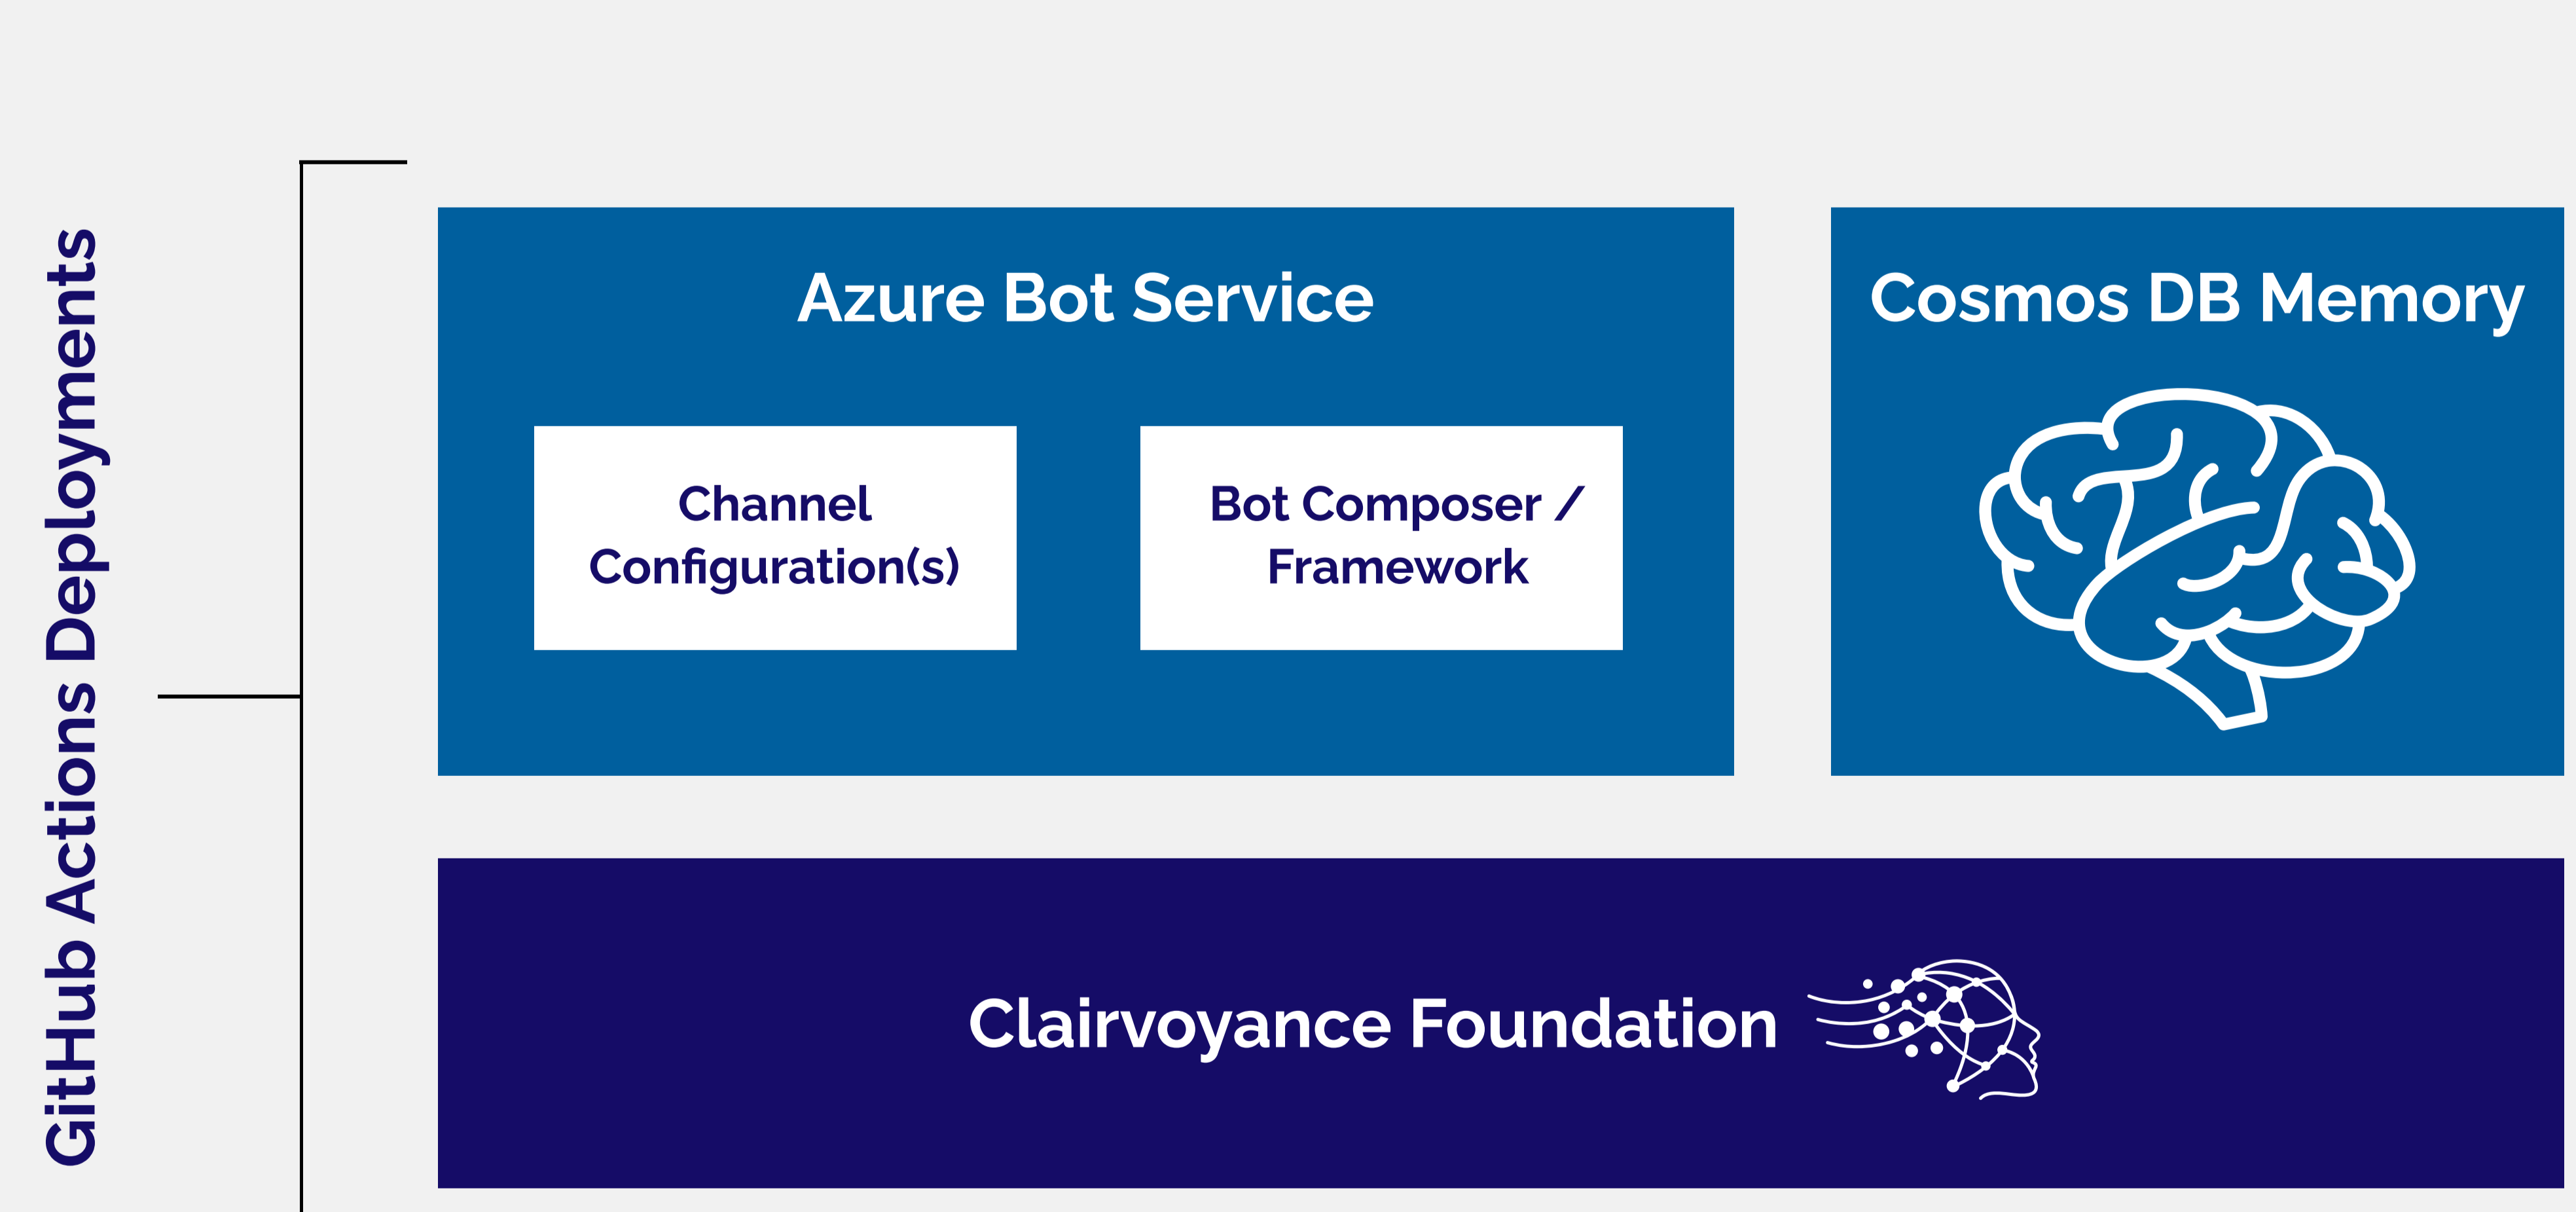

Customer-Facing Assistants
Foster deeper brand loyalty through innovative personalized customer experiences. **75% of customers** believe generative AI will vastly improve their interactions with companies (Forbes).

Research Assistants
Boost team proficiency in extracting insights from corporate documents and data. It is estimated that **knowledge workers spend roughly 2.5 hours per day** searching for information (IDC).

What You Get With Clairvoyance Assistants

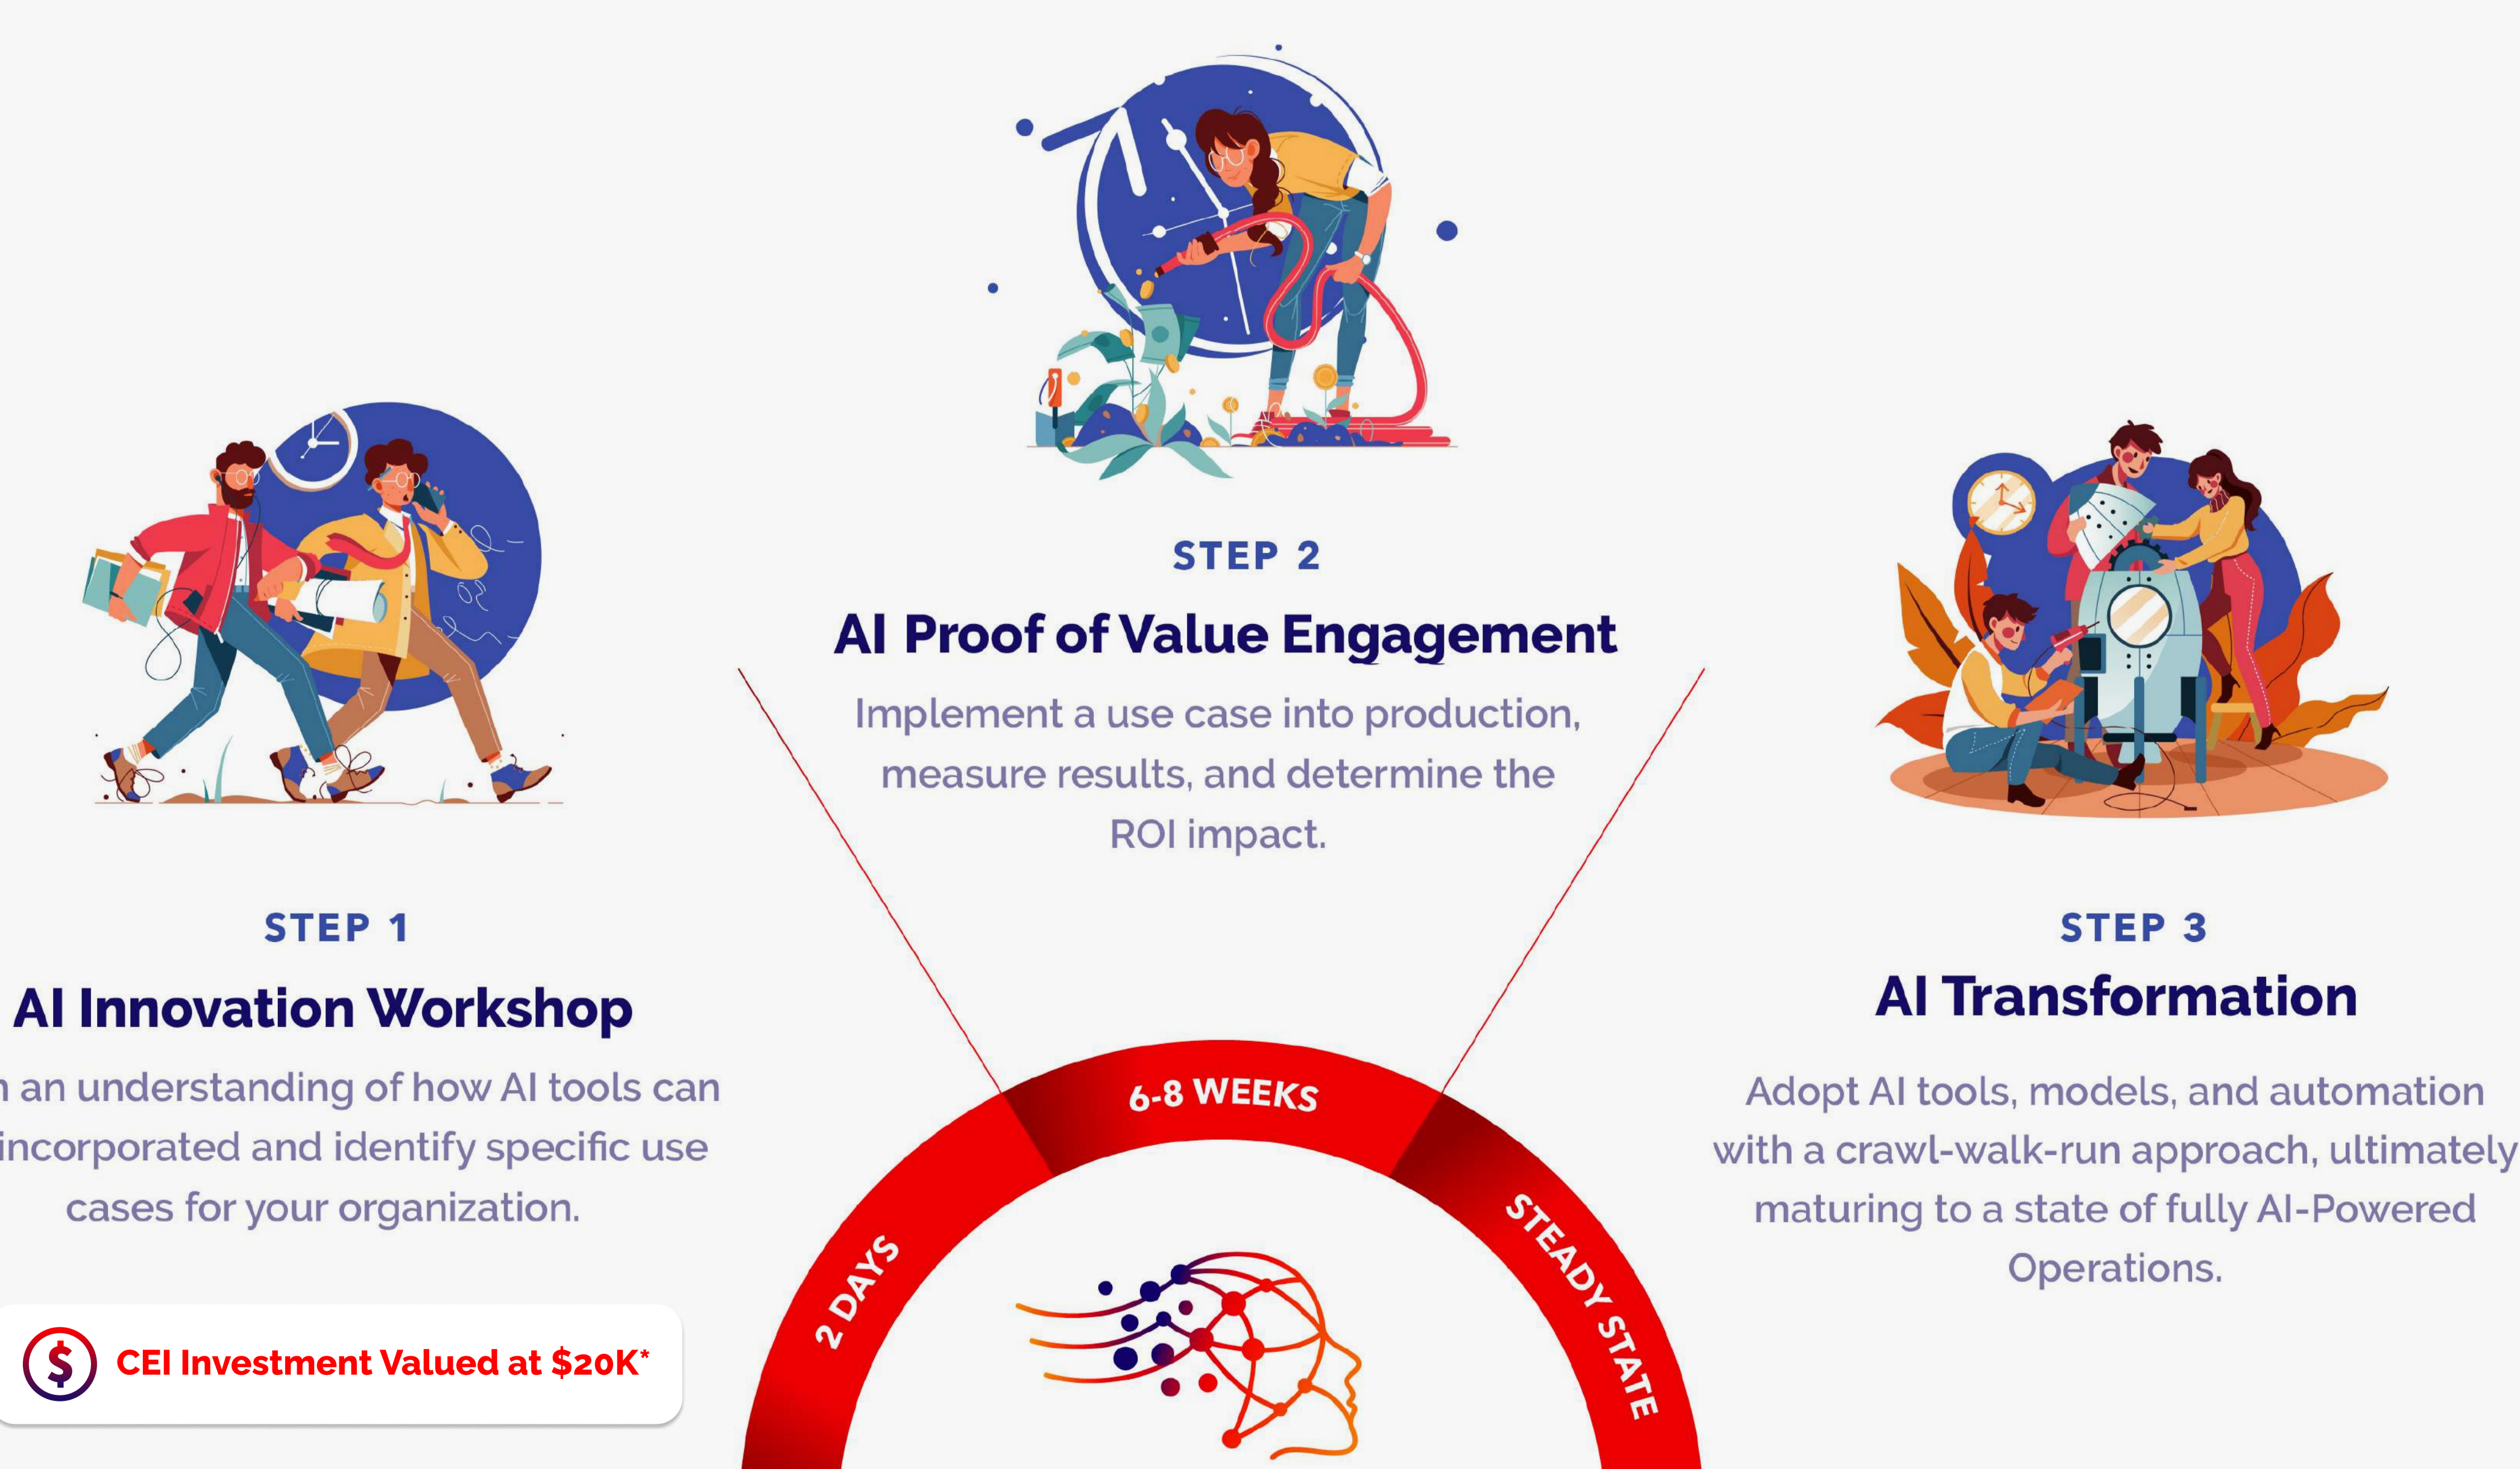

How It Works

Embrace the future of your organization by making the most of the AI revolution. Clairvoyance Foundation and the Assistants Accelerator are your first steps toward embracing AI across your enterprise.

CEI's 3-Step Approach to Clairvoyance Foundation

What you should expect when implementing Clairvoyance Foundation into your business processes.
