**Data Discovery**

Discover your business' non-compliant data without looking for a single file

All companies must keep track of the personal data they store. Social security numbers, health records, contracts, and more. That is a lot of data to look through manually. Automate this process with Cookie Information and base your GDPR compliance on data – not assumptions.

DATA DISCOVERY

94 /100   447   1 y

What you get:

- ✓ Automatic identification of personal data
- ✓ AI data mapping
- ✓ Automatic classification of personal data
- ✓ Compliance Dashboard to display violations
- ✓ Automatic notification of violations
- ✓ Plug & Play integration to your systems

Automatically finds and classifies personal data

Cookie Information's Data Discovery automatically finds and classifies personal data across emails, files, and folders. Violations are ordered in 3 groups based on GDPR risk. Always know what personal data you store.

Automatically notifies responsible employees

Data Discovery automatically notifies employees about their own violations, so you do not have to. They can see all their violations, take appropriate action and resolve them easily. Lean back and watch your company's violations go to zero.

Complete overview of risks and violations

Your Compliance Dashboard displays risks and violations. Monitor the progress of each risk and make sure all violations are solved timely. Solve violations without the manual work.

GDPR compliance

The GDPR requires you to know what personal data you store and process. With Data Discovery, you automatically find personal data which may pose a risk to your compliance. Ensure your business' GDPR compliance.

Plug & Play integration

Cookie Information easily integrates with popular services like Microsoft Office 365, Google Workspace, and many more. If we don't have the integration, we can build it!

Personal and dedicated support

Compliance is not a project but a process. We take great pride in helping you implement Data Discovery in your systems, so you can comply with the GDPR. You can always call us.
