

Innovative Solution for Content Processing

Coforge Quasar AI solution is an accelerator solution for content processing and analyzing. It helps in standardizing and structuring large amounts of text data, quickly extracting and converting multiple data formats to a single template determined by you. Advanced text-based software features like Clustering, Topic extraction, Sentiments, Financial, Legal and Contract files handling adds value and makes data more informative and insightful. All this is underpinned by an intuitive user interface that makes Quasar quick and simple to use.

Benefit

- Integrates easily with existing systems
- Flexible – it can be tailored to your requirements
- Quick implementation
- Makes processes transparent driving efficiency and profitability

Capabilities

- Information Extractions (Non-Template approach)
- Context based Search on Documents
- Entity Understanding and Sentiment Analysis (Real Time)

- Document Content Enrichment
- Knowledge Graphs on Documents
- Advanced Text Analytics
- Auto Document Clustering and Tagging

Features

- Powered by Azure AI Cognitive services
- State of the art - NLP, NLU and other algorithms
- Extracts, Cleanses, validates and standardizes documents
- Highlights errors, non availability, and issues

- Intuitive reports / analysis
- API's for easier downstream integrations
- Simplifies building text-based use cases for businesses
- Advanced algorithms for text mining and analytics
