

Secure Score - actionable security analytics

What is Microsoft Secure Score

Secure Score helps customers quickly figure out what actions they can take to improve your score. They can check their action queue and find the change they can make that most improves their security posture with the least amount of usability impact for their users

Customer Benefits

Secure Score helps organizations:

- Report on the current state of the organization's security posture.
- Improve their security posture by providing discoverability, visibility, guidance, and control.
- Compare with benchmarks and establish key performance indicators (KPIs).

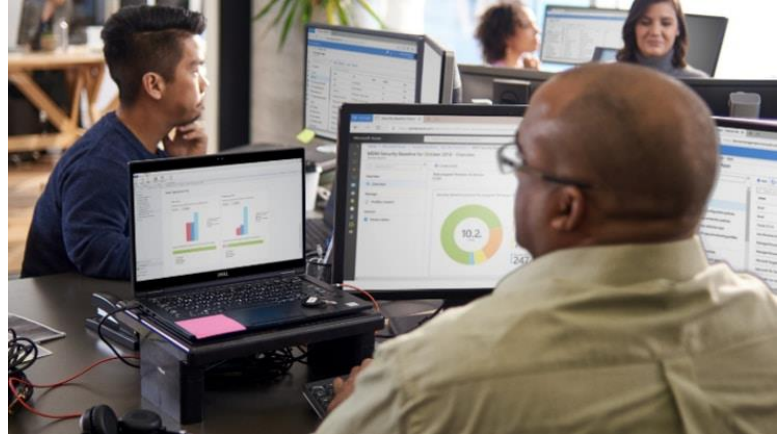

Microsoft Secure Score is a measurement of an organization's security posture, with a higher number indicating more improvement actions taken.

Following the Secure Score recommendations can protect your organization from threats.

Use intelligent insights and guidance to strengthen your organization's security posture with Microsoft Secure Score.

Microsoft Secure Score

Get visibility, insights, and guidance to maximize your security and take advantage of Microsoft 365.

Assess your security posture

Assess the state of your security posture across identity, devices, information, apps, and infrastructure. Benchmark your organization's status over time and compare it to other organizations.

Identify areas to improve and create a plan

Evaluate each recommendation using embedded guidance to determine which vectors of attack are a priority and how they can be mitigated. Add improvement actions to your posture improvement plan.

Drive posture improvements into production

Use integrated workflow capabilities to help determine potential user impact and the procedures necessary to implement each recommendation in your environment.

Report improvements to leadership

Use historical reports to track and maintain progress, identify regressions, and report to leaderships teams. Using measurable data, clearly demonstrate the progress you're making to better secure your environment.
