

Dynamics GP/NAV to Business Central: 2-Day Envisioning Assessment

Not sure if your existing Dynamics GP/NAV system needs an upgrade? Take our 2-day Dynamics 365 Business Central Envisioning Assessment and find out.

Leverage Synoptek's certified Dynamics 365 experts to identify the next steps for upgrade.

Our 2-day assessment will help you cover the first two stages of the upgrade: evaluation and analysis and provide a personalized upgrade roadmap. Synoptek will also help you review your current licenses and provide an estimate for corresponding licenses in Dynamics 365 Business Central.

Assessment Requisites

01 / A list of current pain points and manual work-arounds.

02 / Current list of operating companies, locations, organization structure, and and consolidations.

03 / Timeline and budget for a potential upgrade.

04 / Admin access to your current GP or NAV system for review.

Agenda for Synoptek's Dynamics 365 Business Central Envisioning Assessment

DAY 01 Functional Assessment

- Virtually meet with the executive and leadership team to discuss business objectives and vision for the upgrade.
- Virtually meet with the functional SMEs to understand the current business processes and how they have changed from what was setup in your current system.
- Understand the current infrastructure and implementation as well as discuss major customizations/integrations.
- Review business documents, customer and vendor interactions, and item characteristics that are currently documented outside of the current ERP system.
- Review high-level business and reporting objectives.

DAY 02

- Review of current licensing.
- Discuss with business owner's and SME's new functionality available within Dynamics 365 Business Central that may be of value to them.
- Review the SaaS software model and the Microsoft roadmap for the Dynamics product line.
- Provide a brief demo of Business Central.

Deliverables

With our 2-day envisioning assessment, we will evaluate your existing AS-IS technical environment and provide a solution design and vision for your potential environment post Dynamics 365 upgrade. We will also provide a detailed upgrade plan including:

- Recommendation on upgrade vs re-implementation.
- Possible roadmap and next steps.
- High-level understanding of the new SaaS licenses model and a license transformation guide.
- Overall viability of Dynamics 365 Business Central upgrade for your business.
- A budgetary estimate of an upgrade including ISV extensions, modifications, and possible hardware needs.
