

# Scalable Equipment Rental and Maintenance Software You Can't Outgrow

Easily check equipment availability and reserve units, generate quotes and contracts, prepare shipments, dispatch units and resources, return and inspect equipment, invoice recurring rentals, manage rental packages and sub-rentals, track repairs and maintenance, and quickly process real-time data with ODT Rentals.

## Manage Rentals, Service, and Financials in One Centralized System

ODT Rentals is a fully featured financial, operations, and rental system with optional service built for Dynamics 365 Business Central. It is designed to eliminate duplicate data entry and help you take control of your rental and service business.

“

*With the efficiency gains through using ODT solutions, we expect our rentals revenue to grow by at least double after a year's time.*
