

Power BI Analytics FastTrack

What is Power BI?

Power BI is a way to explore data and visualize it. It plays a role in data quality, data manipulation and transformation, and provides a platform for data governance.

What is a Power BI Analytics FastTrack?

A Power BI Analytics FastTrack helps with gaining an understanding of how Power BI can help transform their business by making data driven decisions utilizing new insights into their data. This FastTrack solution will be leveraged as an introduction to Power BI. It will consist of a kick off call, development of the report, and a final product. This effort is minimal and is leveraged to create a Proof of Concept (POC). The intent is that the report data will be validated but it will be considered a minimal viable product (MVP) at the end.

Goal of the Project

- Development of one report within Power BI
- Live connection to a simple data source
- Consultative overview of the development
