Manufacturing; Supply Chain Management

To cope with supply chain disruptions, companies must gain visibility into all parties' processes, be resilient, and catch up more opportunities.

CHALLENGES

Uncertainty of demand, supply, global warming disaster, political turmoil cause a bad impact on supply chain.

IDEAL SOLUTION

The system must come with precise operation, seamless working with all parties (buyer, seller, manufacturer, contractor, logistic, DC, and etc.. It must help a customer plan, forecast, prioritize more effective even demand spikes dramatically.

DESIRED OUTCOMES

Companies get insight to manage predict and prioritize high demanded items to ensure that replenishment and order are managed properly. Also, they can collaborate with vendors, manage contracts, build redundancy for critical supplies. The operational cycle is shorter, higher efficient, and easier to see working progress.

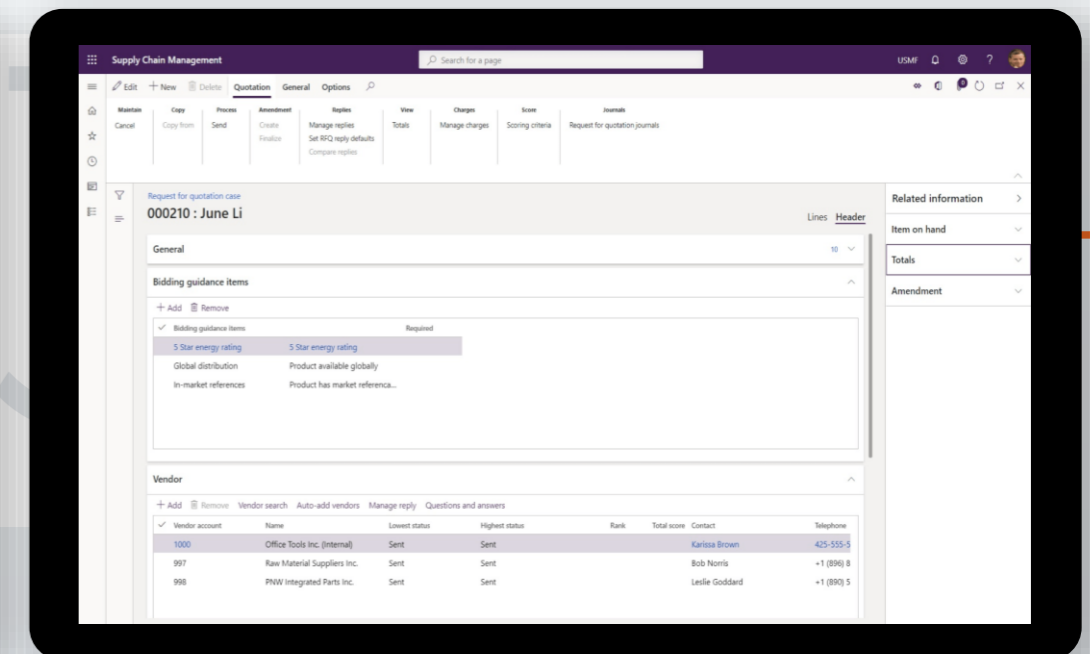

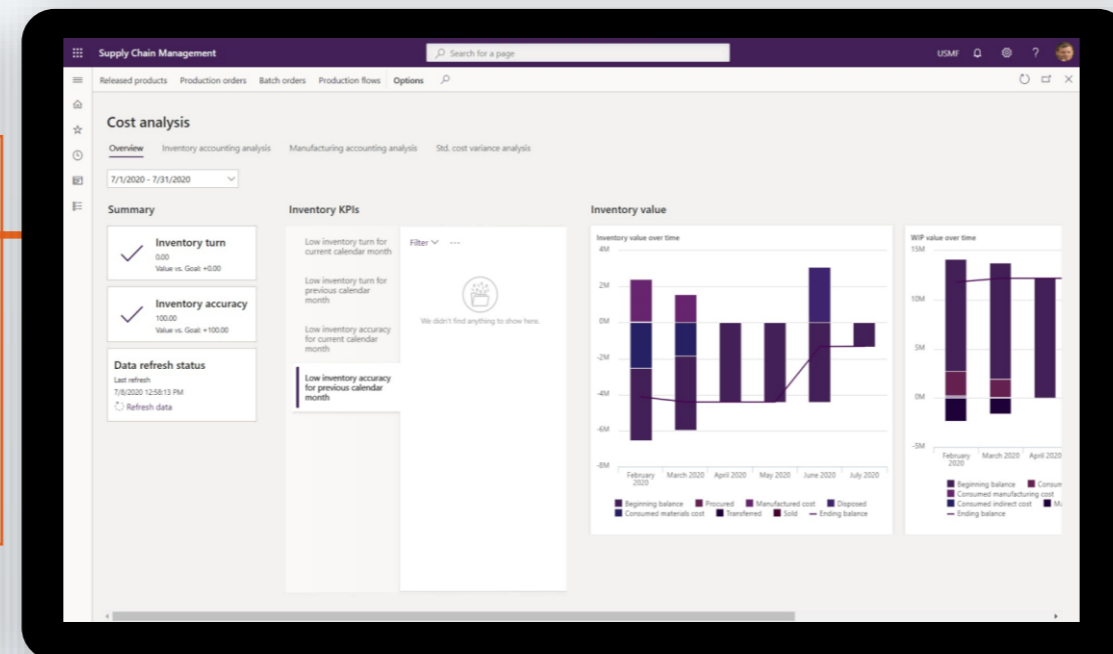

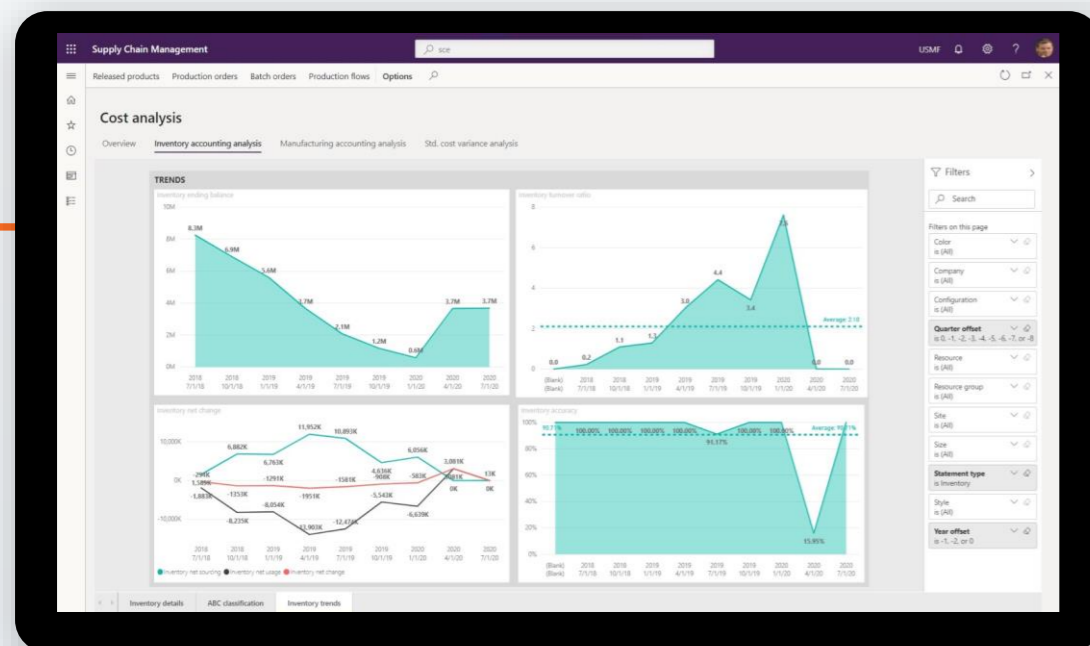

A#SCM365

Deliver cross-channel inventory visibility in real time to streamline production and fulfillment, and optimize inventory, reducing overstocking and stock-outs.

Maintain multiple cost-accounting ledgers globally to streamline cost-management policies and perform cost and profit analysis in real time.

Bhatara Progress Co., Ltd.
