

# BITSCAPE

## Dynamics GP Workplace Automation

### Robotic Process Automation (RPA)

The Perfect Solution to Empower  
your Legacy ERP System

# Bitscape RPA: Technology that build the Future

The **power** to techy glance into the **Future** is something superior every business's **success plan** needs nowadays. Be it for your plan to increase the **profit** margins or assurance of backup for the coming outbreak or pandemic.

Advanced business processing can lead to success and operating through **technology** can lead you towards victory with accuracy.

That is where we want to pick you with us, and **our expertise** in **technologies** like **Robotic Process Automation (RPA)** gives us confidence for such leadership.

## Bitscape Offers an Acute Solution to each Industrial Problems by Accounting on the Futuristic Technologies!

"Dynamics GP  
Workplace  
Automation"

A specialist efficiency, exactness, and benefit. More or less, there is the thing that Bitscape's RPA based Dynamics GP **Workplace Automation guarantees**. A solution intended to lessen or eliminate the need to have **employees perform high-volume, high-value tasks**, RPA can bring deftness across capacities and businesses. Normally, the Next degree of functional **greatness** is the thing that lies ahead for **your business**.

Scenario that brought  
the Idea of Innovating  
Dynamics GP  
Workplace  
Automation

Earlier, we had a requirement from our existing customer who is using **Dynamics GP** for their **business empowerment**.

At that point, we didn't have any clear idea about what solution we could provide them. Today, with this **successful integration of RPA** with Dynamics GP, we will have some concrete solutions for various industries, helping them handle their operation under **Dynamics GP** efficiently.

## Business Challenges

- Configuration of approvals & alerts in legacy systems like MS Dynamics GP
- Non-updated & notification disabled Operations
- Uncoordinated workspace
- Time consuming manual approval procedures
- Often window or screen change requirements

# Secrets that can uplift your business economies

**HIGHER EFFICIENCY** RPA brings decreased process duration and upgraded **efficiency** to the table because of its capacity to work all day, every day.

**ADVANCED ANALYTICS** With RPA making gathering and coordinating information simpler, you can anticipate **future results** and advance the process cycles.

**GREATER PERFORMANCE AND QUALITY** Robots work reliably & resolutely and **guarantee** more prominent precision bringing about more significant outcomes.

**COST SAVINGS** To supplant a full-time resource with RPA based product can **achieve 25-50%** expense reserve funds.

## Fascinating Resolution

- We have chosen **Microsoft Dynamics GP**, a legacy system, as our central technology around which **our solution** revolves.
- MS Dynamics GP is an **organization-centric solution** that limits its utilities in comparison to cloud-based Dynamics 365.
- The business case would be via **RPA**; the documents will be displayed under a single location. With AI Forms Processing, data will be extracted and captured under **MS Dynamics GP**.

# | Result

01 The use of the Legacy system continues for the users.

02 Will be able to pitch the right solutions to their target audiences.

03 Efficiency gains

04 Reduction in errors

05 Increased agility

06 Better use of people power

07 Improved customer satisfaction

08 Standardization of processes

09 Business continuity support

10 Money Saving

**Bringing customer satisfaction is what we think for you!**

While working with the features of RPA, we realized that we could apply the technology to improve **functions & operations** with day-to-day **O365** applications as well, such as Excel, Outlook, PDF or any format files, and much more.

We could extensively use RPA with any browser to record the process and apply it as a part of the flow to **our solution**.

**72%** of organizations will work with RPA, predicts Gartner.

**\$ 1 billion** is the total amount spent on RPA software between 2019-2021.

**78%** of organizations expect continuous and sustained adoption of RPA.

**70%+** of organizations have piloted or are actively using RPA, according to Gartner.

**54%** of the leading companies in Latin America have already started some RPA initiatives.

## Vision

**The solution** we have provided is our very first step/trial towards promoting the use of RPA to make the **best legacy systems** available in day-to-day operations.

Our vision is to automate many legacy systems while also enabling multiple forms' approvals, email notifications, and alerts using **Robotic Process Automation**.

# Why Dynamics GP Workplace Automation?

**Break down the barriers to automating legacy software with RPA.**

Robotic Process Automation (RPA) mimics user interactions on screen and across systems to free us from those repetitive tasks.

- Faster output at a lower cost
- Reduce human-error
- More time for innovation and strategy

## Features

- 1 Automated extraction of information
- 2 Search & Capture specific information from Dynamics GP
- 3 Sequential Approval Processes set up via Email
- 4 "Active" Item notification to approvers on every cycle.

# Benefits of Robotic Process Automation

## Accuracy

Extreme accuracy and uniformity - much less prone to error or typos

## Improved Employee Morale

Workers can dedicate more time to engaging, interesting work

## Low Technical Barrier

No programming skills necessary to configure a bot

## Productivity

Process cycles times are much faster compared to manual process approaches

## Compliance

Bots follow regulatory compliance rules to a tee and provide an audit trail history

## Reliability

Bots tirelessly work 24/7 without interruption

## Non-Invasive Technology

No disruption to underlying legacy systems, reducing the burden on IT

## Consistency

Routine tasks are performed the same way each and every time

# Why should you go for this solution?

72%

of organizations will work with RPA, predicts Gartner.

38%

Compliance

27%

Productivity

Compliance & productivity improvements are the most commonly observed RPA benefits

4X

Top performers earned nearly 4X on their RPA investments, while other enterprises earned - 2X

5  
Years

If RPA growth trend continues, RPA will achieve "Near universal adoption" in 5 years

# 2.0 Plans/Enhancements

- MS Teams Configuration with the solution to be continued.
- With our ongoing development process, we have come up with two modules of MS Dynamics GP for now.
- Research and Development is a continuous process to reach out at certain innovation and being the reason, our team will keep on innovating.

Bring a Simplified Experience Home to Bring the  
Future in Present!!
