Are You Getting
All the Benefits of
Microsoft 365?

If you are using GoDaddy Office

365, we strongly recommend a different approach: Going through GoDaddy limits your security options and certain features, such as Teams Voice, PowerBI, Power apps and the latest from Viva. To get the most out of your Microsoft 365 email, you need to license the full product. We can help. With a seamless GoDaddy 365 to Microsoft 365 email migration, you will be up and running under a full Microsoft license quickly and at little to no cost. Plus, SkyTerra will become your Microsoft licensing partner, giving you access to outstanding expertise and support when you need it. Here's what you gain with a GoDaddy to 365 migration:

- Full Microsoft security suite
- Teams Voice, Power BI, Power apps and the latest from Viva
- SkyTerra's No Lost Emails Guarantee
- Ongoing MS licensing

management by a Tier 1
Microsoft Gold Partner

- Fully optimized Microsoft licensing

LET'S DISCUSS YOUR MIGRATION NEEDS

Why Migrate from GoDaddy Office 365 Email?

GoDaddy MS 365 email is actually a completely separate license and interface. So if you're using Office 365 email from GoDaddy, you aren't getting the same interface and features that you get when licensing directly from Microsoft.

With changes to Microsoft's licensing model, now is the perfect time to switch. That's because businesses of all sizes can benefit from no-cost or low-cost migration plans. If your business has 20 employees or more, SkyTerra can perform your migration for free (no upfront or ongoing costs). Have fewer than 20 employees? SkyTerra can migrate your business from GoDaddy to Microsoft 365 for a one-time, at fee of \$1,000. (Ask us how to limit licensing expenses from GoDaddy.)
