

# Bringing Together the Power of Your EHR And Azure

Public clouding hosting is changing the game...

Our proven approach handles more than just your EHR. We help you properly position all your critical systems in a comprehensive & well-orchestrated environment, fueling your healthcare organization's key strategies:

- Patient Experience
- Care Team Coordination
- Medical Imaging
- Data Management
- Data Analytics & Insights

Not until **now**, have you been able to combine the clinical expertise of the industry's leading EHR with the world-class infrastructure of Microsoft Azure.

## The Advantages vs. Other Hosting Solutions

- 1 Ultra stable, scalable, and secure
- 2 Data flexibility & connectivity between all your systems – not just your EHR
- 3 Highly effective & coordinated org-wide version management

### Leading the Way...

- Trailblazing EHR on Azure installs
- We've planned *AND* executed
- Confidently lean on a team who's done it

### Full-Stack Capabilities...

- Success is more than simply hosting your EHR
- Full system knowledge & coordination is essential

### Healthcare Centric...

- We are more than just technology
- Fully dedicated to healthcare for 12+ years

# EHR on Azure: Full-Stack

## An Example View

### CORE EHR

- ✓ Application Layer
- ✓ EDI / File Management / Device Integration
- ✓ Operational Database
- ✓ Multi Purpose Servers

### FULL-STACK

- ✓ Security & User Access Control
- ✓ Ops Support / Change Management
- ✓ Networking / Connectivity
- ✓ Reporting & Business Intelligence

“The Focus Solutions team has helped us grasp the full scope - EHR & beyond - of how technology can improve our organization and delivery to those we serve. Better yet, they have been priceless in collaboratively executing on the vision.”

**CURT KUBIAK** - CEO, NOVO Health
