

Cloud Native

There are no maintenance costs for the backend server, OS, and database. The application is powered by Microsoft Azure for maximum system uptime and data security.

Configurable

The system is designed to handle various warehouse requirements for different industries. All business rules are configurable by the customer to meet their operational needs.

Auto Upgrade

New features and patches are automatically deployed to the backend without any additional cost and effort. Upgrades to the mobile app are automatically pushed to supported devices.

Scalable

The subscription starts from 5 users with the ability to add more as the business grows. Multi-Warehouse, Multi-Owner, and Multi-Language are supported out of the box.

Intuitive UX

The easy-to-use Web UI and Mobile App is designed to allow work to be done in the shortest time possible. Built-in dashboards allow users to zoom in to exceptions and take immediate action.

Connected

Rest API for warehouse automation and external system integration is built-in, and cloud printing enables seamless printing of labels. The system is readily connected to popular e-commerce platforms such as Lazada, Shopee, WooCommerce and more.

BROCHURE

AC2 WAVE WMS

Cloud Warehouse Management System

Certified Zebra devices include ET51, MC22, MC33, MC93, TC26, TC52AX, TC57X, ZD400 and ZQ500.

“ We are delighted that AC2’s WAVE WMS has gone live successfully on time and on budget. We are pleased with the outcome, and appreciate all the effort our partner, AC2 Group, has put together.”

Malik Murad Ali
CIO, MYDIN Group.

AC2's WAVE WMS is an advanced, innovative, and highly configurable intuitive cloud solution for any business who wants to optimize their warehouse operation. The software is designed for rapid onboarding your business, connect your business to your ERP or eCommerce marketplaces, manage your inventory with complete visibility using highly flexible operation strategies and rules.

Design for Modern Warehouse

Design-and-Purpose built for distribution, SMB/SME, and eCommerce warehouse operations, WAVE WMS delivers comprehensive functionalities enabling businesses to improve efficiency, increase operation performance, provide better services, fully utilize inventory and space, deliver more with less manpower.

With over 25 years of experience and over 300 successful implementations in Asia, we can meet your needs today and tomorrow. With AC2 WAVE WMS available on the cloud, all functionalities are available to you instantly without the need to worry about IT infrastructure and data security.

Functionality highlight:

Inventory Management: Multiple warehouses, multiple owners, multiple barcodes or pack size per item, AC2 WAVE WMS optimize fulfillment, enable operation to easily configure the desired executions. Besides providing complete visibility of your inventory, the system enables configurable stock rotation rules, inventory strategies and end-to-end inventory tracking.

Receiving & Putaway: With highly configurable rules on receiving validation, unit of measurement and zoning, and with the support of both system-directed and user-directed activities on both paper-based and mobile operation modes, warehouse performance can be improved with streamlined operations.

“ We are very glad to have selected AC2 Group to be our supply chain solution implementation partner. They have deep domain knowledge and have helped us greatly in advising us and designing processes.”

LOH YEW CHI

General Manager for Supply Chain, Markono.

“ We want to make fintech services inclusive throughout our travel and lifestyle ecosystem. I want to thank AC2 Group for their assistance to deploy this innovation across the group so smoothly.”

SIVA INDRAN

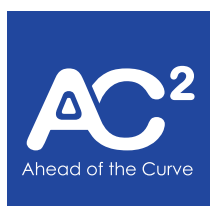

Head of Supply Chain, AirAsia.

Wave & Waveless: Prioritize or assign tasks, auto-run or manual run, schedule tasks for B2B or B2C eCommerce operations. With or without running a wave, the flexibility in our WMS greatly improves warehouse throughput with less labor.

Picking & Replenishment: With our system providing visibility in optimized picking, operations will be able to picker faster with less effort. Optimized picking includes order pick, batch pick, cluster pick, assigned pick, optimized sortable, replenishment and system auto or user defined task priority and more.

Enterprise Integration: Integrate with your current accounting system or Enterprise Resource Planning (ERP) system, our WMS enables seamless integration so you can completely focus on growing your business.

eCommerce Ready: Ready connections with marketplaces such as Shopee and Lazada. Our WMS receives orders from marketplaces in real time, so you can focus on fulfilling the orders and getting more sales. The ready eCommerce connectors greatly reduce your time to market.
