

# Underwriter Copilot

# Features & Benefits

Coforge Underwriter Copilot AI solution is an accelerator for helping underwriters deal with complex decisioning to balance competing factors influencing the risk and price. It helps in providing a simulation hub of how the premiums are affected based on changes in multiple parameters. Advanced regression model, intuitive UX, and simulation hub adds value and makes decision making by underwriters faster and grounded in data.

## Features

Regression Analysis Model

Simulation Hub

Single Pane View

Intuitive UX

Microservice Based Architecture

Gen AI Assistant

## Benefits

Increased efficiency

Easy to maintain

Increased security

Readily available solution

Improved CX

Low Implementation cost
