

Power BI Showcase

What is a Power BI?

Power BI is a way to explore data and visualize it. It plays a role in data quality, data manipulation and transformation, and provides a platform for data governance.

What is a Power BI Showcase?

The Power BI Showcase is a Proof of Concept (POC) to be leveraged to display the benefits and ease of the analytics tool. Once the POC is completed, the client can show other business decision makers the difference in their current reporting solution and the enhanced visualizations within Power BI. Typically, this is a very small effort that can assist in the software selection process.

Goal of the Power BI Showcase

- Display the abilities of Power BI
- Drive adoption of the analytics tool within your organization
