

Dynamics Beyond provides a proven assessment to help customers understand the work required to migrate to Dynamics 365 as well as the business benefits and return on investment. This will provide your company a clear view of workloads, timeline and migration approach. This assessment will bring you a step closer to migrating to Dynamics 365 and will help your stakeholders understand the level of effort and benefits of the migration. The assessment is available for all versions of Dynamics AX and it is driven by our team of professionals working directly with you.

The assessment will provide the following:

- Identification of scope for the project
- Review and understanding of current customizations
- Specific modules that will be required in Dynamics 365
- Recommended Project Approach
- High Level Timeline
- Estimated Costs
- Business Benefits
- Expected Return on Investment
- Licensing estimation

The assessment is typically conducted over 2-3 days and will require interaction between your business decision makers and the Dynamics Beyond business transformation team.
