

Service Name: Power Virtual Agents In a Day

Service Description

Power Virtual Agents in a Day is an entry-level course created for everyone to learn how to use conversational chatbots that can have intelligent conversations with your consumers and staff at scale. Whether you are an IT developer or a business expert, Power Virtual Agents will teach you how to create intelligent chatbots in a single day rapidly.

Learn how to use intelligent conversational chatbots at scale to answer quickly to your customers and staff. Using Power Virtual Agents, anyone—a business expert or IT developer—can quickly learn how to create intelligent chatbots in just one day.

This training provides practical hands-on experience with an experienced partner who specializes in creating Power Virtual Agents solutions in a full-day instructor-led chatbot creation workshop.

In this workshop, you'll better understand how to:

- Create your chatbots quickly.
- Quickly take action with seamless integrations.
- Create intelligent bots with detailed, customized discussions.
