

Power BI Tune-up

Take your Power BI reports to the next level with Onex's expertise and experience. Polish your reports to shine and get the most out of your data visualization.

- Tabular model optimization
- Reports redesign
- Proper report governance

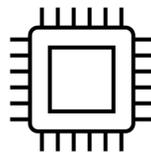

Service designed to help you optimize the Power BI environment by taking care of the model structure and its optimization, redesigning reports and adjusting them to your company's brand book. Additionally, we will analyze your current governance structure and approach to security and role management.

Our customers highlighted following benefits out of it:

User-friendly reports

After our tune-up, customers feel that the reports are lighter and more intuitive, allowing them to make decisions more efficiently.

Increased performance

We help optimize tabular model to achieve better performance and reliability, ensuring that it meets the evolving needs of business

Enhanced Compliance

Thanks to our approach, customers appreciate the clear way of managing permissions and sharing reports within the organization

Scope of work

Onex Group offers efficient approach with results purely based on your environment. The entire Power BI Tune-Up will be performed within **2 weeks**.

The offer includes:

- **Kickoff Meeting:** We will conduct an initial meeting to discuss the scope of the engagement, including reports and model review, business measures understanding and current governance.
- **Power BI Reports redesign:** Based on whiteboarding session with business representatives, we will prepare first mockups for acceptance and then finally we will adjust reports to new design including company brand book.
- **Tabular model optimization:** Based on the assessment, we will analyze the tabular model performance and measures implemented on top of it.
- **Final Report:** We will provide a final report summarizing the findings and recommendations from the engagement, including the recommended actions and their impact on the entire Power BI platform within organization. In the final report, we will also describe the best way for managing reports sharing in the organization with role management.

To estimate final price, we need only four things from you!!

- How many reports would you like to tune-up?
- How many tables your tabular model contains ?
- Number of DAX measures you have implemented in this model?
- Number of business departments engaged ?

Based on our experience, the cost for this service for medium-sized organizations typically ranges from **3 000 USD – 10 000 USD**
