

Automated Management of Hybrid Cloud

Oracle Database Service for Azure (ODSA)

Multi-cloud Architecture Benefits

Execute workloads at the location of your choice

Choose the best cloud provider for your applications and databases. Mission-critical enterprise workloads in OCI and Azure.

Build and Use Oracle Database through Azure

Combining Azure services with the high performance, high availability, and automated management of Oracle Cloud Database services in new applications.

Use a Fully Managed Oracle Database

Quickly and easily use Azure applications with highly available Oracle Autonomous Database that can be deployed, tuned, secured and scaled.

Oracle Dedicated Database Function on Cloud

Include Oracle Autonomous Database, Exadata database service, MySQL HeatWave and Oracle Database Service, with Real Application Cluster (RAC) and other Oracle Cloud functions.

About Cloud Fees

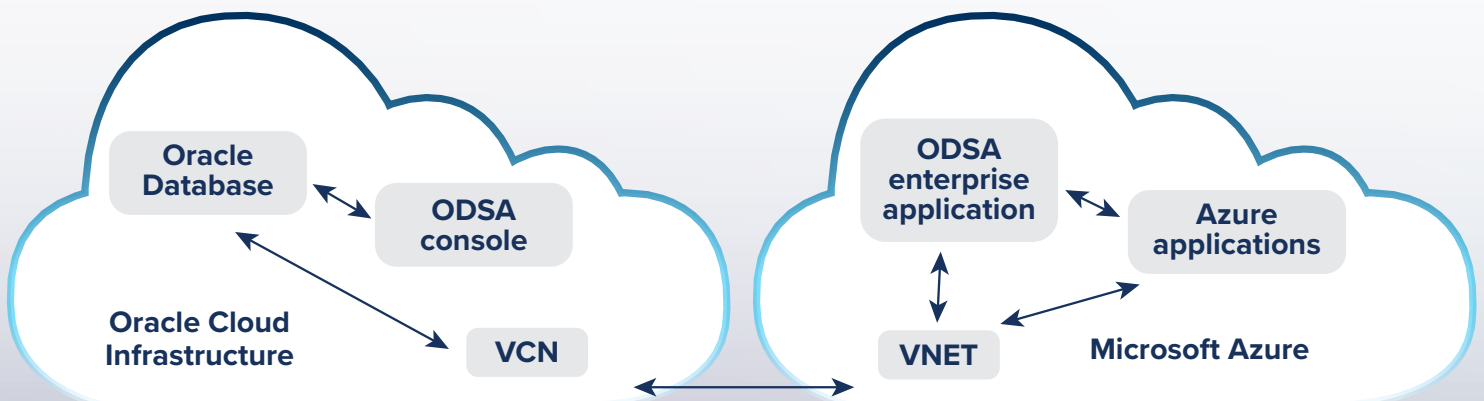

OCI Side

- DB service opened form ODSA
- Other services enabled on OCI

Azure Side

- Virtual network peering
- Other services enabled on Azure

Oracle-managed cross-cloud interconnect
