

SECURE IDENTITY ASSESSMENT

Your Roadmap for Future Identity Management

Top 1% Cloud Solution Provider

94 CSAT Help Desk Score

Managed Solution's Secure Identity Assessment goes beyond identifying vulnerabilities—it empowers companies to regain control. Our experts delve into the intricate details of your Microsoft 365 licensing, highlighting underutilized services that can strengthen your defenses. By consolidating security services, you can unlock cost savings and create a robust defense against cyber threats.

Delivering best practices for improving security posture:

Comprehensive Assessment Report

A detailed document summarizing findings, vulnerabilities, and recommended security improvements tailored to Microsoft technologies.

Security Roadmap

A roadmap with clear steps for enhancing security, configuring systems, and adopting best practices in your Microsoft environment.

Current Security Snapshot

A clear overview of your current Microsoft security infrastructure, so you can understand where you stand.

Compliance Benchmark Report

An evaluation of your compliance with industry standards and regulations that apply to Microsoft technologies.

Prioritized List of Risks

A ranked list of risks, vulnerabilities, and weaknesses, so you can address the most critical issues first.

Enhanced Disaster Recovery Plan

Recommendations for improving your incident response and disaster recovery plan.
