

D365 CLOUDSHIFT: UPGRADE FROM QUICKBOOKS TO DYNAMICS 365 BUSINESS CENTRAL

Benefits of Dynamics 365

- Manage all your business processes from any cloud-connected device
- Minimize data risks with Microsoft's industry-leading cybersecurity standards
- Continually updated so you're always on the latest version
- Eliminate your on-premise hardware expenses with a predictable subscription billing plan
- Quickly adjust to the size of your present and future business demands
- Integrated with many Microsoft applications your business already uses, such as Word, Outlook, Excel and Teams

How Does It Work?

D365 CloudShift is a migration package developed by Calsoft Systems to move your business onto a modern cloud-based ERP platform.

We will:

Body

1. Evaluate your current QuickBooks operations and map all workflow requirements to Dynamics 365 Business Central
2. Configure a testing environment and import master data with our migration template
3. Empower end users through hands-on training, testing, and go-live transition

With over 1,500 completed projects and more than 25 years specializing in ERP solutions, we can meet your IT needs.
