Enhance warehouse processes with our flexible mobile WMS solution!

The NP WMS solution provides a variety of tools and processes for managing and tracking items in warehouse and inventory systems. Our solution connects the inventory management data in Business Central with your POS solution and your online stores, making each item visible across the supply chain, distribution centers, and sales channels. It also enables the management of warehouse processes in Business Central with a mobile device app possible from any location and at any time. Whether your business operates on a large scale or a small one, NP WMS is the go-to solution for transforming your warehouse management into a seamless, easy-to-use, and cost-effective process.

Say goodbye to inefficiencies and hello to a well-organized, optimized, and successful warehouse operation with NP WMS.

1. Mobile device app for warehouse management

NP WMS enables users to perform all daily warehouse management tasks using handheld devices. This means your team can manage processes and track inventory from any location and at any time, providing unprecedented flexibility and responsiveness.

2. Scandit Camera Functionality

With NP WMS, you can utilize the imbedded camera functionality from Scandit, eliminating the need for additional scanner hardware. The app is compatible with newer Android devices, including tablets and smartphones, and supports hardware from Honeywell and Zebra.

3. Swift implementation and minimal training

The implementation process is incredibly cost-efficient as customers can easily configure the solution themselves. With access to Business Central SaaS and the NP WMS app, customers can get started within hours. Furthermore, the app's intuitive design requires minimal training, allowing your employees to adapt quickly and efficiently.

4. Powered by Dynamics 365 Business Central and RFID technology

NP WMS is built upon the robust foundation of D365 Business Central, ensuring seamless integration with your existing ERP system. Additionally, the solution is accelerated with RFID features for high-performance inventory management, providing real-time, accurate data.

Explore the key features our NP WMS solution for efficient management of warehouse operations:

- **Barcode Tracking:**
Enhance flexibility by incorporating barcode scanning and RFID reading into your mobile devices.
- **Inventory Management:**
Take full control over your stock with real-time visibility, minimizing stock discrepancies.
- **Order Management:**
Manage orders from all sales channels in a single platform, eliminating the risk of overselling.
- **Merchandise Refill:**
Optimize your product range, ensuring the availability of popular items on your shelves. Receive notifications for stock replenishment or set up automatic reordering to streamline procurement.
- **Picking & Packing:**
Guarantee precise order fulfillment, ensuring the right items reach their destinations.
- **Receiving & Putaway:**
Utilize handheld RFID readers to register new arrivals in a matter of seconds.
- **Returns:**
Efficiently handle returns to maintain customer satisfaction.
- **Shipping Management:**
Achieve order accuracy close to 100%, ensuring customer satisfaction.
- **Wireless Warehouse:**
Ensure stocks are readily available to meet your customers' needs.
- **Multi Warehouse:**
Gain full visibility and manage inventory across multiple warehouses with ease.
- **Loss Prevention:**
Build efficient loss prevention and reduce inventory shrinkage with accurate insight into the when and where of each item.
- **Mobile Apps for Android and iOS:**
Download the app on your favorite device and pair it with a handheld scanner for easy usability.
- **Cloud WMS:**
Connect and optimize every aspect of your supply chain with tools tailored to your specific needs.
- **Built for Retail:**
Seamlessly track inventory from the warehouse to the sales floor, enhancing visibility and reducing stockouts.
- **RFID Tag Tracking:**
Effortlessly track inventory throughout your supply chain with RFID tag labels.

WAM DENIM

“Thanks to the RFID technology, we know where all our products are – even though we have well over 1,000,000 items. It gives us a unique insight into every nook and cranny of the business and has created the visibility and customer experience we wanted.”

Samim Nasrollah, CEO, Wam Denim

We would love to hear from you!
