

Columbus[®]

Enable agile processes with Columbus Test Automation Services

Columbus is a global IT services and consulting company that offers a comprehensive solution portfolio with deep industry knowledge, extensive technical expertise, and profound customer insight. We have proven this through 30 years of experience serving more than 5,000 customers worldwide.

What do we offer?

Aiming to address the challenges of executing manual testing, our 100% continuous test automation services will help you reduce your overall testing time, risk, and cost. Our Test Automation Services include a comprehensive range of automated testing components that promote innovation, efficiency, quality, and business-focused testing.

Our Test Automation Services entail a combination of :

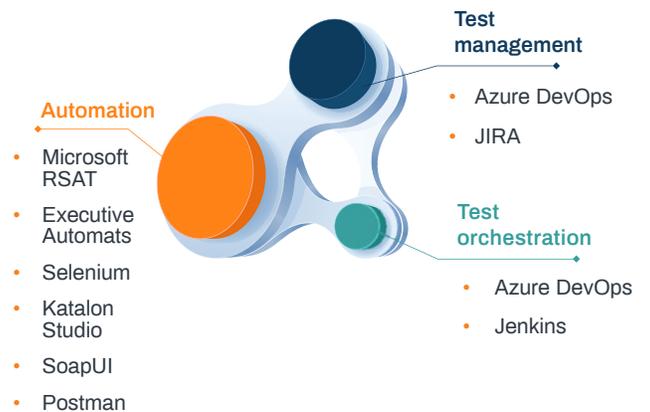

- Tool selection
- Test strategy
- Pilot case
- Test planning
- Roadmap
- Ongoing maintenance
- Advisory
- Test automation
- Continuous testing

You can accelerate software testing cycles and releases, achieve higher defect removal efficiency, and ensure health checks post-production through our proven automation frameworks. In addition, our automated regression tests can further reduce the risk of new deployments, giving you a competitive advantage on your digital transformation journey.

Our Test Automation services come with expertise in

Here are the automation tools we work with
