

BUILD YOUR OWN BUSINESS APP

LEVEL ●●○ ADVANCED

COURSE DESCRIPTION:

Build your own company solutions for your questions. In this workshop, you will learn how to implement business-supporting apps with the low-code platform from Microsoft. We tailor the content to your individual requirements. There will be two experienced trainers helping you implement your own business app.

FORMAT:

2 Days / each 4 Hours

AGENDA:

- Presentation of the app ideas
- Training on data connectors and control elements needed for the implementation of your own apps.
- Supporting hands-on workshop.
- Final presentation of the created apps.

MAX. NUMBER OF PARTICIPANTS:

10 people

TARGET:

We teach you the basics of methodical app development and how to implement an MVP (Minimal Viable Product), which can subsequently be further expanded through the knowledge gained. The aim is to acquire in-depth knowledge of the various functions, connectors and control elements in Power Apps. You will gain advanced knowledge of process automation using Power Automate and learn how to embed relevant dashboards from Power BI into your own app.

PRIOR KNOWLEDGE REQUIRED:

- You should be familiar with the basics of Power Apps, Power Automate or Power BI depending on your App Idea (for example, through our Basic Workshops).
- Your own, business-relevant app idea.
