

# Windows 365 Readiness Assessment

Hybrid work creates new opportunities, but it also creates new challenges. New employees need to be onboarded, distributed teams need to be connected, specialized workloads need to be enabled, and new projects need to be scaled-up, and all this needs to be done securely and compliantly.

With Windows 365, get the scalability and security of the cloud and the familiarity of a PC into one seamless experience, enabling your employees to securely stream the full Windows experience on any personal or corporate device.

<b>Your content</b> wherever you go	<b>Compute options</b> for different users	<b>Consistent settings</b> across devices
The <b>apps</b> you need, when you need them	<b>Scalable storage</b> based on your needs	Integrated <b>unified security</b> and <b>identity management</b>

## Minimize disruption during Windows 365 implementation

Netrix Global is a leading Microsoft Modern Work partner. In this assessment, we will analyze your existing VDI environment and proactively identify any potential technical or procedural risks that could impede the rollout.

### What we review

**Duration: 3-4 Weeks** **Cost: \$10,000**
