

UPGRADE FROM DYNAMICS GP TO DYNAMICS 365 BUSINESS CENTRAL

D365 CLOUDSHIFT

Migrating to the cloud made easy

D365 CLOUDSHIFT is a migration package developed by Calsoft Systems aimed at shifting your company onto a modern ERP platform.

Benefits of D365 Business Central

- Eliminate the cost of managing on-premise hardware by switching to a predictable subscription billing model.
- Mitigate potential security risks and meet compliances while leveraging Microsoft's world class security standards.
- Take advantage of a polished user interface that looks and feels just like other familiar Microsoft apps.
- Utilize modern integration with many Microsoft applications such as Word, Outlook, Teams, Excel, and others that your business is likely already using.
- Operate on a scalable system that easily grows and shrinks to fit present and future business demands.
- Cloud hosting provides hassle free upgrade process to always be on the latest software version.
- Easily transition or maintain remote work by accessing your cloud based ERP system from almost any device.

Calsoft's Experience

With over 1,500+ completed projects and more than 25 years spent specializing in ERP solutions, we are confident in our ability to satisfy your business' requirements.

How Does it Work?

Step 1 - We configure three Dynamics 365 Business Central environments: Sandbox, Development, and Production.

Step 2 - Calsoft utilizes an in-house developed migration template in order to import Dynamics GP master data to Dynamics 365 Business Central.

Step 3 - We leverage world class user training and materials to bring users up to speed with Business Central's functionality to guarantee a successful Go-Live.
