Infrastructure Migration
Workshop

What we offer

Our Infrastructure Migration Workshop is a one-day hands-on workshop for IT Project Managers and IT Pros that focuses on the value, process, and tools involved in migrating from server to Azure.

This workshop is offered by Devoteam in partnership with Microsoft. This workshop will provide you with the knowledge and skills to confidently migrate to Azure, on-premises infrastructure such as Windows servers and Linux servers, line of business applications and their associated database.

The workshop covers both technical aspects as well as guidelines in line with the Cloud Adoption Framework. In this workshop, you will learn the value of implementing a Landing Zone, how to design and implement your first landing zone, and then you will use Azure Migrate to migrate an application.

Learn with Devoteam how to successfully perform an Infrastructure Migration, in this value packed workshop!
