

POWER AUTOMATE – PROCESS AUTOMATION

LEVEL ●○○ BASIC

COURSE DESCRIPTION:

The Power Automate training format includes both a training and a hands-on workshop.

The training will teach you all the relevant skills and tricks you need in order to implement business processes with Power Automate. After this training, you will be familiar with most of the functions of Power Apps as well as Power Automate.

MAX. NUMBER OF PARTICIPANTS:

10 people

TARGET:

In this training you will get to know the performance spectrum of Power Automate. In addition, you will gain basic knowledge about the most important functions and connectors. We will show you how to access various data sources, work with dynamic parameters and apply OData filters.

FORMAT:

2 Days / each 4 Hours

AGENDA:

- Presentation of the concept of the Microsoft Power Platform
- Presentation of the business process that is to be implemented.
- Collaborative development of three workflows without the need for programming
- Hands-On Workshops.
