

# GAIN A DEEPER UNDERSTANDING OF YOUR SECURITY LANDSCAPE

with eGroup Enabling Technologies Cyber Security Health Check

## CYBER SECURITY CHANGES DRAMATICALLY YEAR OVER YEAR - ENSURE THAT YOUR ORGANIZATION IS MEETING THE LATEST CYBER SECURITY REQUIREMENTS.

Sign up for a self-paced, peer-reviewed assessment of your current security-related environment. Based on Center for Internet Security (CIS) control groups, this low-cost program is designed to help Subject Matter Experts document and provide proof that their security posture is in alignment with today's cyber security requirements.

### KNOW YOUR SECURITY POSTURE

Following the health check, our goal is for your team to have confidence in the knowledge of your current security posture. Our team of experts will walk you through the results after your check-up, providing a detailed list of recommendations to help you stay on track.

Designed as a sub-set of CIS to give you a clear overview of your security posture

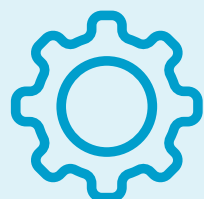

Leverage this Health Check to identify your current cyber security baseline

Add & consolidate document references to provide context
