

Humanize Work

Inspire your Teams to be their Best in
the new Hybrid World!

Adaptive Project Management for the Hybrid World

- > Nimble is the next generation AI-driven Lean/ Agile Work/ Project Management solution focused on helping your teams collaborate, manage and deliver their work effectively and efficiently.
- > Strike the right balance between Remote and In-person, Traditional and Agile, Top-down and Bottom Up, Task Ownership and Resource Assignment, and so on.
- > Let our collaborative Work Management solution help your teams connect in real-time, collaborate better, innovate, inspire each other, and succeed together – delivering projects efficiently.

Nimble helps you make Workplace more Humane!

➤ Helps you and your coworkers connect, reach out, and help each other.

➤ Visualizes work and shows everyone the bottlenecks and performance improvements.

➤ Helps you see your colleagues, customers and partners for who they really are and what motivates them.

01

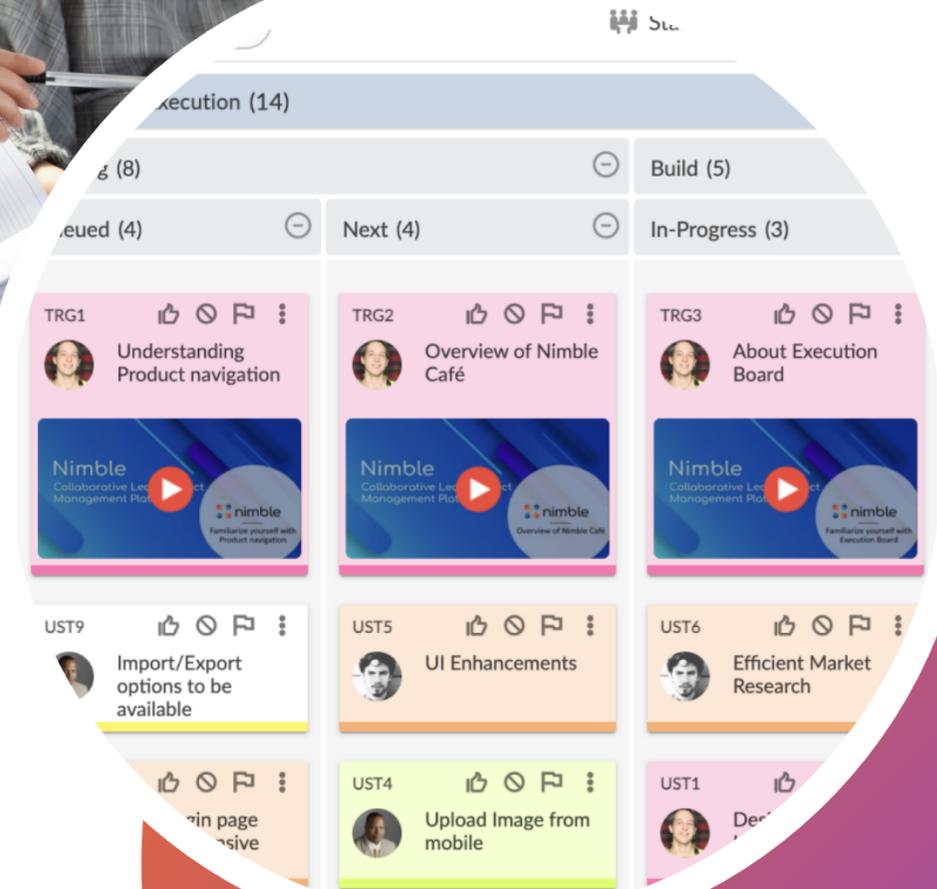

Visual Work Management

Remote or On-premise, manage your projects with ease! Manage work visually on powerful Boards. Combine traditional planning with Agile Execution, Get full visibility into your teams' work and deliver your projects successfully!

02

Be Nimble! Be Agile!

Whether you are into serious projects or ensuring smooth flow of work for your team or function, you must already be using – or considering – Agile methods of delivering your work. Irrespective of where you are, Nimble has you covered.

Plan, Track & Manage your work

Nimble combines all the planning and execution capability with an equally powerful dashboard and reporting module. Whether it is a single workflow on a Kanban board, or a single project plan, or an entire program structure, Nimble's configurable dashboards let you build the exact reporting structure and visualization that you need.
