Discussion

Q&A and possible next steps

Good to know

PARTICIPANTS

Developers

Business Users

IT Professionals

Note: You don't need IT knowledge to gain value from this offering. Managers gain knowledge about what has been created on their watch. IT Professionals have a list of users, applications, security and governance concerns to address. Users and Developers get insights into their projects and better understanding of the Platform's capabilities. Different personas will be invited for different stages as per the agreement.

OTHER DETAILS
