

Microsoft Threat Protection Workshop

Do you know how many phishing attacks your organization has received? If employees are using the right password protocol? Whether personal data is being exposed? In short, is your organization's cloud environment as secure as you think it is?

Organizations today are managing a growing volume of data and alerts while dealing with tight budgets and vulnerable legacy systems. Get help achieving your broader security objectives —and identify current and real threats—by scheduling a Microsoft Threat Protection Workshop.

Gain visibility into immediate threats across email, identity, and data, plus clarity and support on how to upgrade your security posture for the long term.

Review your security goals and objectives

Identify real threats in your cloud environment with Threat Check

Map identified threats to specific solution recommendations

Showcase security scenarios with product demos

What to expect:

Given the volume and complexity of identities, data, applications, devices, and infrastructure, it's essential to learn how secure your organization is right now, and how to mitigate and protect against threats moving forward. By attending this workshop, you can:

Identify current, ongoing security threats in your cloud environment

Document your security strategy for the benefit of key stakeholders

Walk away with actionable next steps based on your needs and objectives

Better understand how to accelerate your security journey using the latest tools

Workshop Objectives

During this workshop, we'll partner with you to strengthen your organization's approach to cybersecurity. We'll help you better understand how to prioritize and mitigate potential attacks, with:

- Deep analysis of cyberattack threats that are found targeting your organization
- Actionable recommendations to help immediately mitigate the identified threats
- A detailed assessment of your IT and security priorities and initiatives, direct from cybersecurity pros
- An inside look at Microsoft's holistic approach to security, and how it relates to your organization
- Demonstrations of integrated security, including the latest tools and methods
- Long-term recommendations from Microsoft experts about your security strategy, with key initiatives and tactical next steps

Workshop process

1. Pre-Engagement Call
2. Kick-Off Meeting
3. Cloud Discovery Log Collection
4. Threat Exploration
5. Threat Results Presentation
6. Engagement Decommissioning

Who should attend

- Chief Information Security Officer (CISO)
- Chief Information Officer (CIO)
- Chief Security Officer (CSO)
- Data Protection Officer
- Data Governance Officer
- IT Security, IT Compliance, and/or IT Operations
- Data Governance

Improve your security posture with a Microsoft Threat Protection Workshop.

ProArch was founded on the belief that a future where change is 'business as usual' is fundamentally more exciting than one where it is not.

We accelerate value and increase resilience for our clients with consulting and technology- enabled by cloud, guided by data, fueled by apps, and secured by design.
