

## SoftwareOne Copilot Advisory: Discover

# Understand your organisation's readiness for Copilot for M365

As organisations consider integrating Copilot for M365 into their workflows, it's natural to have questions not only about how to effectively implement this solution but also about how to understand its added value, navigate security and compliance risks, and adequately prepare for this transformative journey.

At SoftwareOne, we understand how difficult it can be to navigate these complex considerations, which is why we help organisations become early adopters of Copilot for M365 by guiding them through the process of exploring and preparing a readiness plan.

### SoftwareOne Copilot Advisory: Discover addresses three critical areas:

We assist companies to prepare for the Copilot for M365 implementation by helping them in building, operating, and managing an AI-powered, high-performance workplace. SoftwareOne Copilot Advisory: Discovery aims to assist enterprises by addressing the following:

1

Identify clear, prioritised use cases where Copilot for M365 can be leveraged to drive business outcomes

2

Understand the licensing, security, compliance, data, and organisational pre-requisites involved in implementing and deriving value from Copilot for M365

3

Develop an initial implementation plan for Copilot for M365.

# Unlock your Copilot for M365 readiness

Before plunging into a Copilot for M365 installation, organisations must solve a number of critical technical and organisational challenges. These questions will pave the road for a successful integration and utilisation of Copilot's transformative power in your organisation. **SoftwareOne Copilot Advisory: Discover** gives enterprises the first opportunity to learn how to fully utilise Copilot for M365 and to understand the implementation readiness. Our tailored engagement ensures that clients are well-prepared to tackle

the difficulties of a Copilot implementation. They will obtain a deeper grasp of Copilot for M365 through an expert-led session and interactive conversations, allowing them to properly leverage its potential. Our experience, delivered by our team of experts in Digital Workplace, Adoption and Change Management, Security, Data and Open AI, includes defining Copilot's capabilities in relation to our clients' goals and assessing licencing, technical, and organisational preparedness.

## Here's how our discovery advisory unfolds:

|  |   |  |   |  |
|--|---|--|---|--|
| <b>Part 1</b><br><hr/> <b>Starter Session</b><br>Introduction to Copilot for M365 and calibration of workshop agenda to your objectives and AI-readiness state | <b>Part 2</b><br><hr/> <b>Technical Session</b><br>Investigation of your current infrastructure, application landscape, and data architecture to determine the ability to realise Copilot for M365 benefits | <b>Part 3</b><br><hr/> <b>ROI and Use Cases</b><br>Identification of clear, prioritised use cases where Copilot for M365 can be leveraged to drive business outcomes via practical Design Thinking Workshops | <b>Part 4</b><br><hr/> <b>Organisation</b><br>Assessment of organisational preparedness to support effective end-user adoption, training, and proficiency within daily workplace applications | <b>Part 5</b><br><hr/> <b>Executive Report</b><br>Presentation of readiness assessment, benefits, costs, ROI, recommended next steps and initial implementation plan |
