

# EduVault is a secure platform designed for Education Credential Verification

## About EduVault

EduVault is a cutting-edge solution developed by Fusion the Apps People and is part of the SIS Global Group of brands. Designed with a global outlook, EduVault ensures data privacy and security through its robust network of data center nodes adhering to compliance standards and laws.

## What we offer

EduVault is an innovative platform that provides a secure and efficient way to manage and store education credentials. With its centralized repository, user-friendly interface, and automated verification process, EduVault streamlines the credential verification process for academic institutions, employers, and individuals.

EduVault employs Microsoft Entra Verified ID as its login and certificate generation solution. This system is part of the Microsoft Entra identity solutions family and uses a standards-based Decentralized Identity approach to enhance user, app, device, and service provider trust and security.

Additionally, its integration with existing systems and accessibility from anywhere, anytime make it a convenient solution for all users.

## EduVault's secure platform offers:

- Centralized Repository
- Trusted And Secure Verification
- Microsoft Entra Verified ID
- User-friendly Interface
- Automated Verification
- Integration With Existing Systems
- For universities, academic institutions & colleges

# Why Microsoft Azure?

## Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools

## Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

## Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

## Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a \$1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
