Secure Copilot Inception

Safely explore Microsoft 365 Copilot, with Increment

The era of AI has arrived with Microsoft 365 Copilot, the powerful new AI assistant within the Microsoft 365 apps you know and love! Microsoft 365 Copilot leverages OpenAI technology, including generative AI, natural language processing, and Large Language Models (LLMs) to help you boost productivity, unleash creativity and understand information better through a few simple prompts.

It's like a knowledgeable sidekick working alongside you, helping you to effortlessly get more done.

Whether you're just starting on your Microsoft 365 Copilot journey, or are ready to explore features and capabilities, Increment can help you configure and adopt Microsoft 365 Copilot to get the most out of your investment.

How Increment makes your Copilot experience magical

Increment's **Secure Copilot Inception Workshop Bundle** combines Microsoft 365 Copilot Workshops and our Data Security Engagement to give you the ultimate **secure Microsoft 365 Copilot experience**.

Our **Microsoft 365 Copilot Workshops** identify your requirements and assess your technical environment readiness. We will then explore the art of the possible with Microsoft 365 Copilot to help you build a business case for adoption. In our **Data Security Engagement** we explore your Copilot security guardrails using Microsoft Purview. We will locate *your* sensitive data and provide a report on findings and recommendations. Our report also includes a custom solution architecture and plan of next steps to mitigate any data risks.
