

BLACKPOINT RESPONSE

Enterprise-level protection for all

Blackpoint Response includes everything to protect modern hybrid workflows with comprehensive, next-generation endpoint protection and application control, supported by our industry-leading cloud and on-premises MDR. Elevate your security stack with the best in active response through one cost-effective package.

MEET THE PLAYERS

Disrupt the hacker timeline. Blackpoint's patented MDR solution is the first contextually aware breach detection and response program on the market. With unparalleled visibility into hacker tradecraft, lateral spread, and remote privileged activity, we stop advanced attacks immediately.

MDR FEATURES

Ransomware Response

Automatically stop ransomware. Detain all types of ransomware deployments, including drive-by attacks that occur within seconds.

Managed EDR

Elevate your EDR with support from our 24/7 SOC and MDR technology to remediate threats in real time.

Managed Defender for Endpoint

Get the most out of your Microsoft 365 investment. Manage and apply Defender for Endpoint policies to multiple customers with ease.

Vulnerability Management

Security visibility unlocked. Discover and deliver clear recommendations for your end clients' internal, external, and cloud vulnerabilities.

Active response for your cloud. Extend the power of MDR and bring 24/7 expert security monitoring and unified response capabilities to your cloud workflows. Trust leading edge cybersecurity to actively defend your cloud platforms, hybrid environments, and everything in between.

CLOUD RESPONSE FEATURE

Identity Response for Azure

Contextual alerting for unauthorized logins. Identity Response for Azure AD gathers contextual analysis about the unauthorized use of Azure SSO logins.

Curated zero trust, by Blackpoint. Managed Application Control provides our partners with simplified oversight into what matters most. With Blackpoint's MDR capabilities and threat insight, you can apply curated application settings to your and your clients' extended perimeters. Reduce operational bottlenecks, while improving user experience, today.
