

ClubSmart is a sports club management tool designed to automate the process of generating game schedules for a sport club. It takes into account various factors such as player availability, court availability, and player grading to create optimized schedules.

Some of the key features are

- **Player Management:** ClubSmart allows club administrators to manage player profiles, including their skills, and grading.
- **Court Management:** ClubSmart allows club administrators to manage club courts availability.
- **Schedule Generation:** ClubSmart utilizes an algorithm to automatically generate game schedules based on player availability, court availability, and player grading.
- **Optimization:** The scheduling algorithm aims to create balanced and fair game schedules, considering factors such as skill levels, player preferences, and minimizing conflicts.
- **Customization:** Administrators have the flexibility to set scheduling rules and preferences, such as specifying court allocation priorities or ensuring equal playing time for players.
- **User-Friendly Interface:** ClubSmart offers a user-friendly interface that is intuitive and easy to navigate, requiring minimal training or technical expertise. ClubSmart caters to users of all skill levels, ensuring a smooth and hassle-free scheduling experience.
