Understand the impact of Generative AI for Enterprises

About Insight: Generative AI for Enterprise organizations – one-hour presentation

With the launch of new Generative AI-fueled products and services, you and your competitors are presented with opportunities to both optimize and increase output as well as alter your product and service portfolio.

What we offer

The Azure OpenAI Service and Microsoft 365 Copilot are the first products that open opportunities for enterprises to transform their product and service portfolio to utilize and leverage Generative AI technology.

During a one-hour presentation, we will provide tailored insight into the transformative effect Generative AI will have for enterprises, with examples of new products and services being built and how it can supercharge your workforce into improving quality and effectively increase output.

Knowit will help you define and implement your strategy for utilizing Generative AI products such as Azure OpenAI Service and Microsoft 365 Copilot within your organization. Our specialist team has prepared a unified framework of service offerings to quickly adapt and leverage to become a Generative AI-powered enterprise.

Presentation output:

This presentation will provide an overview of the transformational effect Generative AI products, such as Azure OpenAI Service and Microsoft 365 Copilot, will have on various enterprises.
