OMNI ANALYTICS D365 Edition

Your Million Dollar Head Start on Next Generation Analytics for Dynamics

- Empower Finance, Operations, Sales, and Procurement with the most extensive suite of Power BI dashboards for Dynamics 365 available.
- With Microsoft's on-going investment in Dynamics, they now offer the best cloud ERP and CRM suite on the market. OmniData has created a next-generation analytics platform to go with it.
- Over forty dashboards and reports are available out of the box. More importantly, OmniData architected OmniAnalytics D365 on a fully extensible Azure based Modern Data Warehouse. This makes installation, training, support, and customization a snap.
- Finally, your organization can stand up an end-to-end Analytics environment, accessible to all, with relevance to the things that make your organization unique.

WHAT YOU GET WITH OMNIANALYTICS D365

Next Gen Analytics and Reporting

You already know that analytics separates competitive organizations from the also-rans. You also know that the investment can be steep. Tailoring an enterprise-wide analytics program can be tough, just to get started. To operate it and customize it can be frought with technical risk. These are the reasons we offer OmniAnalytics D365.

What you get

- A fully rendered BI program, based on your core ERP data.
- Lowest cloud operating costs
- Fastest response
- Most agile scalability
- Lowest technolgy risk
- Full advantage of all Microsoft's on-going R&D investment
- Simply customizable by your own staff, using Power BI

Immediate Insights, Commitment to Your Success

You'll go from zero to warp speed upon installation. We offer 100% remote installation and service, using our RAD methodology. That means you are up and running in as little as one day. Once installed, OmniData is fully committed to your on-going success.

OmniAnalytics Advantages

- All training is Microsoft certified, provided by OmniData.
- We're commited to your self-sufficience.
- Add on our managed services offerings to save you more than 70% FTE costs
- Customization of dashboards and reports is easy for Power BI trained staff
- Open framework based on Azure offerings allows for customization using your unique additional data sources.

Save Millions on Next-Gen Analytics, On-going

Upon installation, powerful analytics dashboards are available to you and your staff. You decide, using all Microsoft technology, how to govern the information and access to it. When you want to customize a dashboard, simply use Power BI skills to discover insights unique to your business.

From Zero to Infinity w/ Pre-built Assets

- Represents decades of analytics and reporting experience for 100s of Dynamics installations
- Your company's ERP is the hub of your most important data
- Adding your other data sources begins after installation and training, not the third year.
- The result is an end to end analytics program for your organization.
