

Design EHSQ and
ESG digitally.

With a solution that unites.

Your challenge:

Strict legal duties.

Multiple stakeholders.

Increasing complexity.

Our solution:

A clear focus.

A shared idea.

A simple system.

Network yourself. With Quentic.

Link data.

Quentic is the integrative software solution for your EHSQ and ESG management. Finally, information from all work areas can be connected seamlessly. Evaluate your company's performance from different perspectives with pinpoint precision. Discover connections and new opportunities. Accelerate your decisions and control your processes centrally.

Connect stakeholders.

Quentic is more than a data software: Bring together various stakeholders from across occupational safety, environmental management and sustainability in one system. Create seamless transitions between workflow steps, both internal and external. With Quentic, all parties are informed optimally and act in concert—mobile on the go as well as by application at the workplace.

Inspire people.

The simpler the process, the faster the goal is achieved. As one of the leading providers of EHSQ and ESG software, we aspire to create clarity and guidance in a complex business environment and to promote exchange in the community. We will only be happy when you're happy—with solutions that are 100% suited to you and your daily tasks.

Your quantum leap forward. Experience the Quentic advantages.

Welcome to the Quentic Community.

Exchange with our users is important to us. Be there: in person at our growing annual user convention and online in our Quentic Community.

community.quentic.com

Quentic provides advantages for every company, from medium to large, for local as well as global players. Our users from various industries can confirm this. The range includes everything from utilities and waste disposal companies to production companies, logistics companies, and service providers.

How does it work? Quentic is a standard software that is so flexible it can be tied to your company's individual processes. Company-owned structures such as locations, facilities, processes and tasks can be retrieved with perfect precision in your Quentic system.

„Intuitive to control and easy to use.“

Across all departments. Always the perfect solution.

Whether you work with a handful of colleagues or a hundred: In Quentic, every user gets access to the exact work areas, data sets and documents he or she needs. So everyone can concentrate fully on their essential tasks.

Fast access for users in a hurry.

You don't have much time and you like things simple and direct? Your personal overview *My Quentic* shows you everything you need to know. From there, you can get going with just a few clicks and check off all necessary tasks quickly.

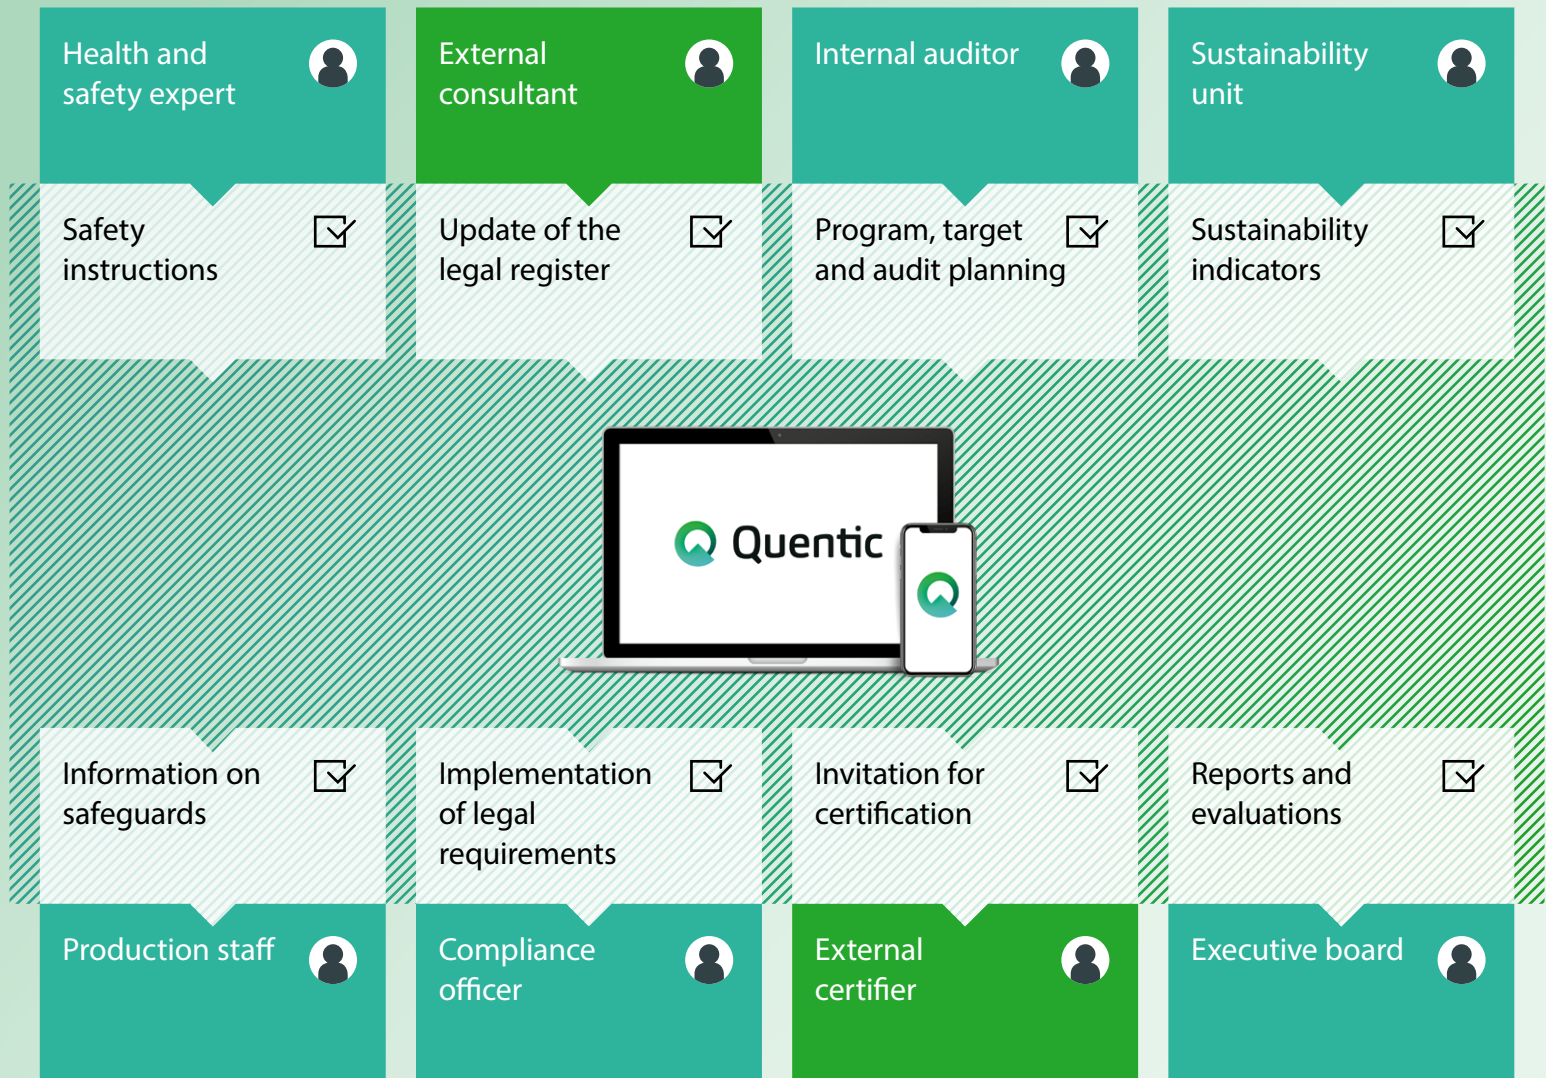

Precise information for in-depth users.

You want to have the whole picture? Quentic provides detailed information in each of your areas of expertise. Clear, uniform data masks facilitate the management of complex issues. Details on reviews and approvals give you additional insight.

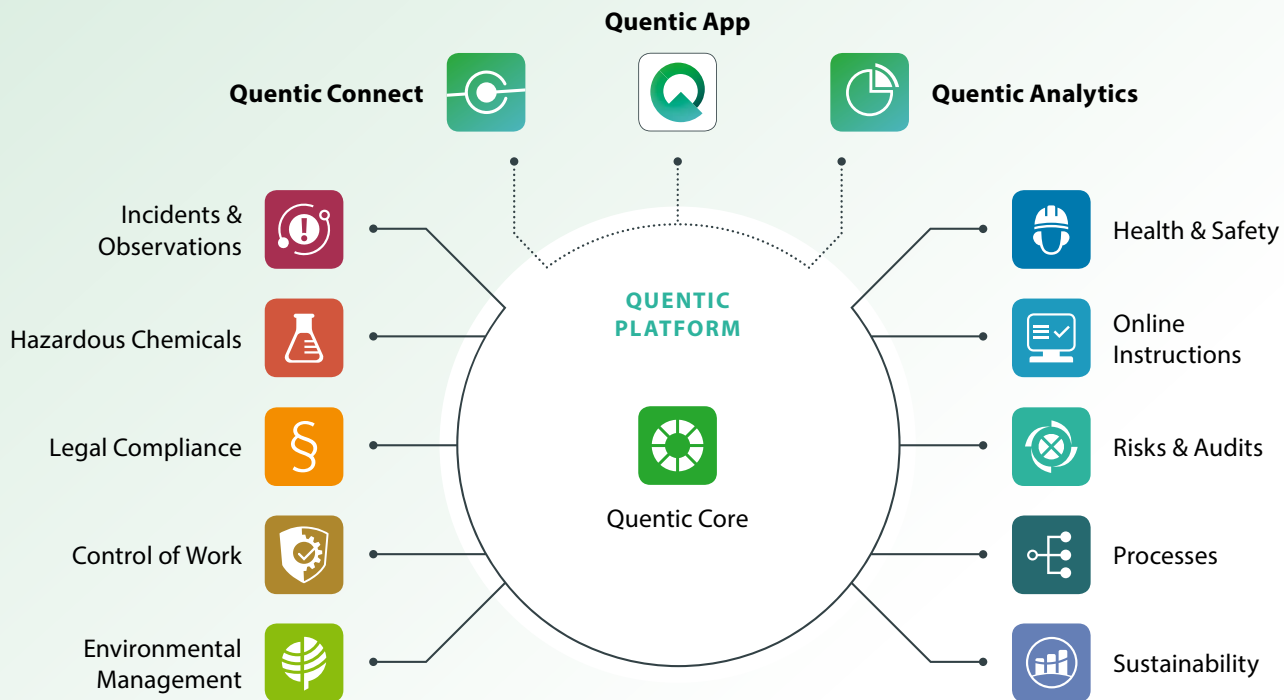

Finished packages for external parties.

You can also integrate external contributors into Quentic, which makes cooperation much easier. In addition, select information as well as complete reports can be converted into common data formats with a click of the mouse and sent by email to external parties.

One holistic system. Infinite possibilities.

So much to choose from! Combine the software modules that you need to create your own unique Quentic Platform. Handle tasks with your smartphone and the Quentic App: anytime, anywhere. Create synergy and connect to third party systems with Quentic Connect. Get data evaluations of the highest quality with Quentic Analytics.
